

Ministry of Finance of the Czech Republic

DEBT AND FINANCIAL ASSETS MANAGEMENT DEPARTMENT

# Debt Portfolio Management Quarterly Review

The Ministry of Finance submits the twenty third *Debt Portfolio Management Quarterly Review* to present the underlying debt portfolio risk management measures and performance with respect to the planned annual financing programme and achieving the medium-term strategic targets of debt management policy. For the year 2010, these targets were quantified by the *Financing and Debt Management Strategy for 2010* released on 3 December 2009 and based on the Finance Minister's decision. The Strategy specifies operating space of the asset and liability management trough issuance activity, financial investment and active operations of MoF on secondary market of government bonds and financial derivatives.

# I. Review of Strategic Targets for 2010

The 2010 state debt management policy is guided by the set of quantitative targets and criteria approved by the Minister of Finance for issuance activities and the active management of debt portfolio as summarized in the following table.

#### Financing programme and strategic targets in 2010

| Criterion                     | Guidelines for 2010  | September 30, 2010 |  |
|-------------------------------|--|--------------------|--|
| International issues          | Max. 50 % of the total annual gross<br>borrowing requirement | 17,6 %             |  |
|                               | CZK 0.0 to 140.0 bn  | CZK 49.2 bn        |  |
| Gross government bonds issues | CZK 102.3 to 292.3 bn  | CZK 138.7 bn       |  |
| Net money market issues       | CZK -25.0 to +25.0 bn  | CZK 40.3 bn        |  |
| Loans from EIB                | CZK 12.7 bn  | CZK 5.4 bn         |  |
| Short-term state debt         | 20 % and less  | 17.6 %             |  |
| Average time to maturity      | 5.5 to 7.0 years   | 6.1 years          |  |
| Interest Rate Re-fixing       | 30 to 40%  | 31.9 %             |  |

Note: EIB – European Investment Bank. Source: MF CR.

As regards **international funding**, on September 6<sup>th</sup> the Czech Republic has issued the fifth public benchmark Eurobond denominated in EUR in the amount of **EUR 2.0 bn**, i.e. **CZK 49.2 billion**, which is 35.1% of maximal international issuance activity according to initially declared financial programme for year 2010. Further, the Czech Republic has drawn three tranches of loans from the European Investment Bank in the amount of **CZK 2.1 billion** during the third quarter. During the first three qurters of 2010, loans were drawn in total amount of CZK 5.4 billion, which represents 42.5 % of the limit in the State Budget Act for 2010.

Regarding **domestic issuance activity**, the total gross issuance of government bonds reached **CZK 53.2 billion** during third quarter, from which tap sales were executed in the amount of CZK 1.0 billion via Reuters Dealing system and the tap sales were also bought by the European Investment Bank in the amount of CZK 1.0 billion. During the first three quarters, the total gross issuance reached CZK 138.7 billion, including CZK 3.5 bn tap sales executed via Reuters Dealing system and CZK 5.0 bn bought by EIB. The total gross issuance reached about 47.5 % of the maximal supply initially announced on 3 December 2010. The net issuance of government bonds was **CZK 53.2 billion** during the third quarter (CZK 117,7 bn during the first three quarters). Buy-backs of government bonds were not executed during the third quarter as well as during the first three quarters.

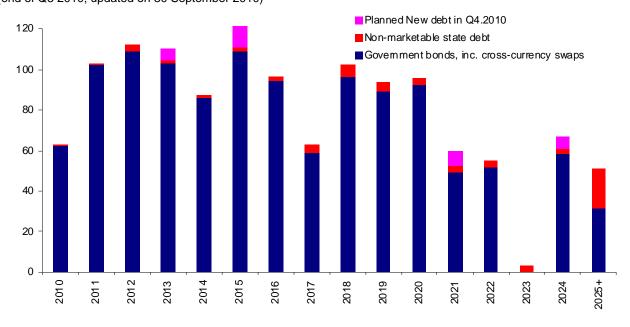

The volume in issue of money market instruments increased by CZK 39.3 billion during the third quarter (CZK 40.3 bn during the first three quarters 2010).

The short-term state debt increased by 1.2 percentage points and reached the share of 17.6 % at the end of the third quarter 2010. It means that the Ministry of Finance maintaines the planned long-term target.

SEPTEMBER 2010

Average time to maturity reached the level of **6.1** years at the end of the third quarter, i.e. remains within the announced target band 5.5–7.0 years for 2010.

Redemption profile of state debt (CZK billion) (end of Q3 2010; updated on 30 September 2010)

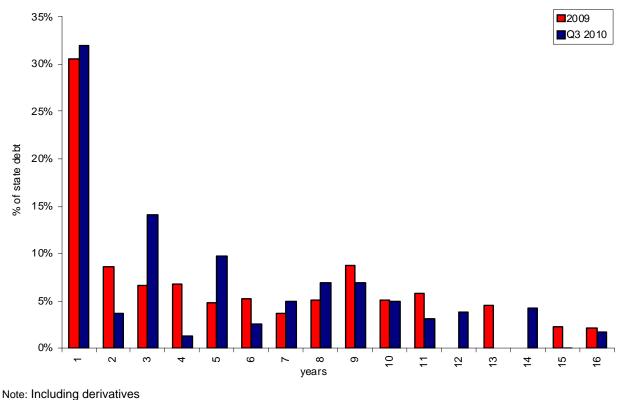

Note: Excluding money market instruments Source: MF CR.

Beginning with the year 2006, **the interest rate re-fixing** up to one year replaces the modified duration targeting in the area of market risk management. The *Financing and Debt Management Strategy for 2010* sets the average yearly range between 30 % and 40 %. This risk measure increased to 31.9 % at the end of the third quarter 2010 and remains in the target range.

Note: (-) means revenues (gains). Source: MF CR.

The **net debt service costs** on the state debt in the first three quarters of 2010 amounts **CZK 24.9 billion**. Accrued interest income and government bonds premiums achieve CZK 9.9 billion and financial investments on the money market gain CZK 0.5 billion. The gross debt service costs reached CZK 35.8 billion.

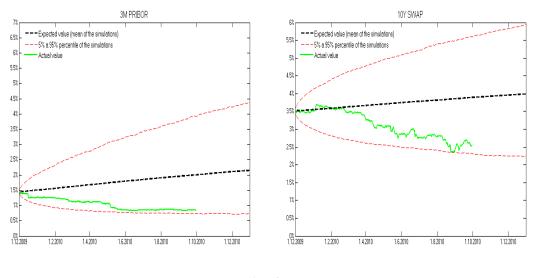

1 Transfers for projects financed from international financial institutions credits

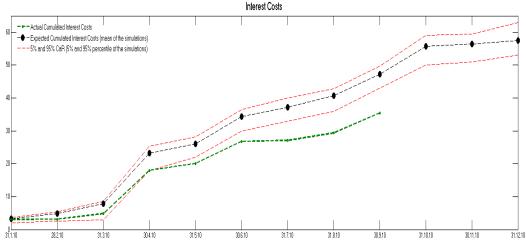

Debt Portfolio Management Quarterly Review – September 2010

The state debt interest costs model **Cost-at-Risk (CaR)** for the year 2010 was published in the *Financing* and *Debt Management Strategy for the year 2010.* Calculations of the CaR values are based on future interest rates simulations.

The actual versus simulated developments of the PRIBOR 3M and 10Y CZK swap from 1 December 2009 till 31 December 2010 are displayed in the upper part of the figure. The development of the actual versus simulated gross interest costs for the first three quarters 2010 is shown in the lower part of the figure.

# Actual versus simulated evolution of the interest rates and the actual versus simulated monthly gross interest costs (CZK billion)

Note: Interest costs are calculated on the cash principle relevant for the current methodology of the state budget. Source: MF CR.

The comparison between the actual development of interest costs and the development of the simulated interest costs at the end of the third quarter 2010 in comparison with the same period of the last year is summarized in the following table.

#### Cost-at-Risk deviation from the actual interest costs at the end of Q3 2009 and 2010

| 2009  | 2010         |
|-------|--------------|
| 35,4  | 35,4         |
| 31,4  | 47,3         |
| 34,3  | 49,8         |
| -11,3 | 33,5         |
|       | 31,4<br>34,3 |
