

DECREE

of 15 January 2019

on the method for gambling operators to notify and transmit information and transfer data, the scope of the data transfer and other technical parameters of data transfer

In accordance with § 133(1)(a) of Act No 186/2016 Coll., on Gambling, the Ministry of Finance lays down the following:

PART ONE

GENERAL PROVISIONS

Title I

BASIC PROVISIONS

§ 1

Subject matter

This Decree specifies the method for gambling operator (“operator”) to notify and transmit information and transfer data to supervisory authorities in accordance with the Gambling Act, the scope of the data to be transferred and other technical parameters of the data transfer, in the form of

- a) remote access, which means secured access to the operator’s server from a remote location providing a chronological overview of gambling and financial data,
- b) daily gambling reports,
- c) daily gambling logs and
- d) notifications or other information transmit to supervisory authorities.

Title II

GENERAL REQUIREMENTS FOR THE AUTOMATED DATA OUTPUT

§ 2

Registration

(1) Operator shall notify to the supervisory authority the technical data necessary to ensure the provision of the automated data output. The supervisory authority must receive this communication no later than 30 days before the date when the automated data output is to be provided for the first time. In addition to the generally required details, the operator shall provide

- a) the operator’s qualified certificate for the recognised electronic seal used in accordance with the Annex for sealing files,
- b) the certificate of the operator’s public key used in accordance with the Annex for the purposes of
 1. file encryption,
 2. authentication of encrypted authenticated transmission,
- c) the part of the operator’s website address that is used in the Annex to compile the address used to
 1. provide the automated data output,

2. send the acknowledgement package if the provided automated data output is formally correct and
 3. send the acknowledgement package if the provided automated data output is not formally correct.
- d) other technical data necessary to ensure the provision of the automated data output on the operator's part in accordance with the Annex.

(2) The supervisory authority shall notify the operator of

- a) the qualified certificate of the supervisory authority for the qualified electronic seal used in accordance with the Annex for sealing files,
- b) the certificate of the public key of the supervisory authority used in accordance with the Annex for the purposes of
 1. file encryption,
 2. authentication of encrypted authenticated transmission,
- c) the website address of the supervisory authority used in accordance with the Annex for providing the acknowledgement package and
- d) other technical data necessary to ensure the delivery of the automated data output on the part of the supervisory authority in accordance with the Annex.

(3) The operator shall notify the supervisory authority of any change in the data under paragraph (1)(a) to (d) and the date from which the modified data shall be used when providing the automated data output so that the authority receives this communication no later than 5 working days before that date.

(4) The supervisory authority shall notify the operator of any change in the data under paragraph (2) and the date from which the modified data shall be used when providing the automated data output so that the operator receives this communication no later than 5 working days before that date.

§ 3

Method of providing the automated data output

- (1) The automated data output shall be provided in the manner referred to in the Annex.
- (2) The supervisory authority shall access the website address used to provide the automated data output no later than 7 days after the date when the automated data output is to be provided; this shall not apply in case of a natural disaster or other extraordinary events.
- (3) The supervisory authority shall in the manner referred to in the Annex generate and submit to the operator the acknowledgement package containing information whether the provided automated data output is formally correct. Automated data outputs that are not formally correct shall not be taken into consideration by the supervisory authority.
- (4) Operator shall provide a single automated data output until the confirmation package on this automated data output is received from the supervisory authority.
- (5) Paragraphs (1) to (4) shall apply accordingly for repeatedly provided automated data output in which errors were corrected.
- (6) For the purposes of providing the automated data output, the automated data output is formally correct if
 - a) it has the prescribed format and structure,
 - b) it is sealed by the operator's recognised electronic seal,
 - c) it is encrypted using the public key of the supervisory authority, and

d) it does not contain gambling and financial data that obviously do not belong into it.

§ 4

Method of correcting formal errors in the provided automated data output

(1) Operator shall correct formal errors outlined in the confirmation package relating to a provided automated data output that is not formally correct within 2 working days from the date when this confirmation package was delivered.

(2) Formal errors in the automated data output shall be corrected by the operator by repeatedly provided automated data output in which these errors shall be removed.

(3) In case that the first provided corrected automated data output is formally correct, the corrected automated data output shall be considered to be formally correct already from its initial submission.

§ 5

Method of correcting material errors in the provided automated data output

(1) In cases of reasonable consideration, operators who have provided a formally correct automated data output containing other than formal errors may correct these errors within 14 days.

(2) Other than formal errors in automated data outputs shall be corrected by the operator by repeatedly providing the automated data output in which these errors are removed, and by notifying the supervisory authority of

- a) the details necessary to identify the corrected automated data output and
- b) the reason for correcting the automated data output.

(3) The time limit for accessing the website address used for providing the automated data output shall begin on the date the supervisory authority receives the communication referred to in paragraph (2). The date of providing the corrected automated data output shall be the date when the supervisory authority receives this communication or the date when this automated data output was actually provided, whichever the decisive date comes later.

(4) The corrected automated data output is also not formally correct, if as a result of its adoption cease to be formally correct any of the previously provided automated data outputs. In the communication referred to in paragraph (2), the operator shall enter the data to identify this automated data output previously provided and correct the formal mistakes which arise in case of receipt of a corrected automated data output under the first sentence.

PART TWO
REMOTE ACCESS

§ 6

Form of providing remote access

Operators who are required to ensure and provide supervisory authorities with remote access shall provide this access in the form of the automated data output.

§ 7

Requirements for providing remote access

(1) When providing the remote access, the gambling and financial data shall be provided in the manner, scope, format and structure referred to in the Annex.

(2) Operators shall provide the remote access three times per calendar day for an eight-hour period starting at

- a) 00:00,
- b) 08:00 and
- c) 16:00 hrs.

(3) If it occurs during the period referred to in paragraph 2(a) that,

- a) daylight-saving time begins, it shall be a period of 7 hours, and
- b) daylight-saving time ends, it shall be a period of 9 hours.

(4) Operators shall provide the remote access no later than 8 hours after the end of the period for which the remote access is being provided.

PART THREE

DAILY GAMBLING REPORTS AND DAILY GAMBLING LOGS

§ 8

Form of providing daily gambling reports and daily gambling logs

Operators shall provide the daily gambling reports and the daily gambling logs in the form of automated data output.

§ 9

Requirements for providing daily gambling reports

(1) The gambling and financial data in the daily gambling reports shall be provided in the manner, the scope, either basic or extended scope, of the format and structure referred to in the Annex.

(2) Operators shall provide gambling and financial data in daily gambling reports covering at least the basic scope of reporting. Unless otherwise provided in the Annex, the gambling and financial data referred to in the Annex represent the basic scope of daily gambling reports.

(3) In the daily gambling reports, operators may deliver gambling and financial data in an extended scope which, in addition to the basic scope of gambling and financial data in daily gambling reports, further include gambling and financial data about particular game of live game which is not operated as an online game neither in the form of a tournament.

§ 10

Requirements for providing daily gambling logs

When providing daily gambling logs, the gambling and financial data shall be provided in the manner, scope, format and structure referred to in the Annex.

§ 11

Operating day

(1) Daily gambling reports and daily gambling log shall contain data for individual operating days.

(2) For the purposes of providing automated data outputs, operating day means the time period during which the operator operates in the gambling premises commenced on a given calendar day and defined by

a) operating hours

b) another suitable method of a duration not exceeding 24 hours in the case of continuous operation

(3) Every moment of the operation falls into one operating day.

(4) In the daily gambling reports and daily gambling log for operating day commenced

a) on the first calendar day of the tax period for gambling tax, the operator shall provide all data proving the circulation of cheques and cash in connection with the operation of casino games and the course of the game and circulation of cash in connection with operating bingo not operated as an online game for this calendar day, even if these data would have otherwise been included in the daily gambling reports or daily gambling log for the previous operating day, and

b) on the last calendar day of the tax period for gambling tax, the operator shall provide only those data proving the circulation of cheques and cash in connection with operating casino games and the course of the game and circulation of cash in connection with operating bingo not operated as an online game for this calendar day.

PART FOUR

**TRANSMISSION AND NOTIFICATION OF OTHER INFORMATION TO
SUPERVISORY AUTHORITIES**

§ 12

Method of transmission and notification of information

(1) When fulfilling an obligation involving notification or transmission of other information to customs administration, the operator shall make the submission using a data message with verified identity of the operator or a representative of the operator in a manner making it possible to log into the operator's data box, or signed in the manner that other legislation associates with the effects of a handwritten signature, always using the form made available on the website of the Customs Administration of the Czech Republic.

(2) If the form is unavailable or if the operator is fulfilling an obligation involving notification or sending of other information to the Ministry, the submission shall be made in electronic format signed in the manner that other legislation associates with the effects of a handwritten signature.

PART FIVE
FINAL PROVISIONS

§ 13

Notification

This Decree has been notified in accordance with Directive (EU) 2015/1535 of the European Parliament and of the Council of 9 September 2015 laying down a procedure for the provision of information in the field of technical regulations and of rules on Information Society services, as amended.

§ 14

Entry into force

This Decree shall enter into force on 1 June 2019, with the exception of the provisions of § 2, which shall enter into force on 1 April 2019.

Ministry of Finance
JUDr. Schillerova, Ph.D.

Automated data output

Section 1

Data package containing the automated data output

Subsection 1

Data package name

I. Name of the data package for remote access

The data package containing the automated data output for remote access shall be named as follows:

<Operator ID> -<Model>-<Reporting period>-<Game type>-<Data package version>

The individual parts of the data package name shall be separated by a hyphen (the character with decimal code 45).

II. Data package name for daily gambling reports and daily gambling log

The data package containing the automated data output for a daily gambling report or daily gambling log shall be named as follows:

<Operator ID> -<Model>-<Reporting period>-<Game type>-<Casino>-<Data package version>

The individual parts of the data file name shall be separated by a hyphen (the character with decimal code 45).

III. Content of individual parts of the data file name

Part of the data package name	Content of the part of the data package name
<i><Operator ID></i>	Identification of the operator providing data package The operator's identification number or, if no identification number has been assigned, the operator's own number assigned in connection with the issuance of the basic license
<i><Model></i>	Data model The single-letter identification of the data model for the automated data output. It shall be stated: M – daily gambling report or daily gambling log. V – remote access.

Part of the data package name	Content of the part of the data package name
<Reporting period>	<p>Identification of the reporting period</p> <p>The following shall be provided for data package for remote access:</p> <p>Specification of the calendar day and hour of beginning of the reporting period covered by the data contained in the data package using the format YYYYMMDDHH, where:</p> <p>YYYY is the numeric representation of the calendar year in a four-digit format.</p> <p>MM is the two-digit numeric representation of the calendar month (01 to 12).</p> <p>DD is the two-digit numeric representation of the day of the month (01 to 31).</p> <p>HH is the representation of the first hour of the reporting period covered by the data contained in the data file (00, 08 or 16).</p> <p>The following shall be provided in data package for daily gambling reports or daily gambling log:</p> <p>Specification of the calendar month from which the data package contains data using the format YYYYMM, where:</p> <p>YYYY is the four-digit numeric representation of the calendar year.</p> <p>MM is the two-digit numeric representation of the calendar month (01 to 12).</p>
<Game type>	<p>Type of gambling</p> <p>The single-letter code of the type of gambling.</p> <p>It shall be stated:</p> <p>L – lottery.</p> <p>K –odds betting.</p> <p>R – totalisator game.</p> <p>B – bingo.</p> <p>T – technical game.</p> <p>Z – live game.</p>
<Casino>	<p>Unique identifier of the casino</p> <p>The part of the item IDMisto after the hyphen (the casino identifier) given in the data file misto.csv.</p>

Part of the data package name	Content of the part of the data package name
<Data package version>	<p>Two-digit version number of the data file</p> <p>The version number of the data file shall form a continuous number series. A zero shall be added to the left of a single-digit version number.</p> <p>When the data package containing the automated data output is provided for the first time, the version number shall be 01.</p> <p>The version number shall go up every time the data package containing this automated data output is delivered repeatedly.</p> <p>The version number of the data package shall not be repeated between the individual data packages whose other parts have the same name.</p>

Subsection 2

Requirements for data files comprising the data package

I. General requirements for the data file

The data file shall be in the csv format with the following features:

1. UTF-8 encoding in accordance with the RFC 3629 standard shall be used.
2. Lines shall be separated using the pair of CR (the character with decimal code 13) and LF (the character with decimal code 10) symbols.
3. The first line of the data file shall contain metadata, the second line shall contain the header and the subsequent lines shall contain the individual entries with each line containing exactly one entry.
4. Blank data file, which is a data file containing no entries, shall only contain metadata and the header.
5. The line with metadata shall have the cross sign symbol (the character with decimal code 35) in the first position followed by the actual metadata of the data file. The actual metadata of the data file shall comprise the following items in the order below, separated by the semicolon symbol (the character with decimal code 59):

Content of the metadata item	Data type of metadata item
Data package name	Text
Data file name	Text
Date and time of data file set up	Date and time
<p>Interface version</p> <p>It shall state the version of the automated data output interface.</p>	Text

6. Both the file header and the entry shall comprise items that are separated by the semicolon symbol (the character with decimal code 59). The items shall be arranged in the order given in the specifications for each data file.

7. The file header item shall contain the machine file name of the item according to the specifications for each data file.
8. The entry item shall contain the item value for the given entry.
9. The quotation mark symbol (the character with decimal code 34) shall be added both to the left and to the right of an item containing the semicolon symbol (the character with decimal code 59). It is not permitted to use the LF symbol (the character with decimal code 10), the CR symbol (the character with decimal code 13) and the quotation mark symbol (the character with decimal code 34) inside item values.
10. Unless expressly stated otherwise, every entry item shall have a value. Entry item without a value (NULL) shall be stated as a blank string.
11. Unless expressly stated otherwise, a previously provided entry, to which a reference link is provided, shall not be included again in a data package containing the automated data output for a different period. Such an entry shall be considered to be stated in the automated data output.
12. The currency code shall always be given in the form of three-letter alphanumeric code of the currency according to the ISO 4217:2015 standard, even if it is to be included in an item indicating also other data.

II. Data types used in data files

Title	Specification
Integer	<p>Integer between $-2\ 147\ 483\ 648$ and $2\ 147\ 483\ 647$.</p> <p>Thousands separators shall not be used. No sign shall be used in the case of a positive number. The minus symbol (the character with decimal code 45) shall be used for negative numbers. Numbers shall be written in the decimal system so that every valid digit represents a separate character (the characters with decimal codes 48 to 57). Leading zeros shall be omitted.</p>
Decimal number	<p>Decimal number between 3.4×10^{-38} and 3.4×10^{38}.</p> <p>The rules for integers shall apply similarly to decimal numbers. The comma symbol (the character with decimal code 44) shall be used as the decimal separator. Unless stated otherwise, the maximum number of decimal places is 2.</p>
Binary value	<p>Numbers 0 and 1 (the characters with decadic code 48 and 49).</p>
Text	<p>A string of characters in Czech language using Latin characters unless stated otherwise.</p> <p>The maximum length of a string may be limited in the definition of the item. Unless expressly stated otherwise, a shorter string is not filled to the maximum length.</p>
Date and time	<p>Date and time, including the time zone, structured in accordance with the RFC 3339 standard. Date is always separated from time using the T symbol and time is given with an accuracy of tenths of a second.</p>
Date	<p>The date is structured in accordance with the RFC 3339 standard.</p>

Title	Specification
Identifier	<p>A string of characters containing only digits 0 to 9 (the characters with decimal codes 48 to 57), capital letters without accents (the characters with decimal codes 65 to 90), small letters without accents (the characters with decimal codes 97 to 122), the hyphen symbol (the character with decimal code 45) or the underscore symbol (the character with decimal code 95).</p> <p>In case of identifier separated on parts, these parts shall be separated with a hyphen (the character with decimal code 45).</p> <p>For a definition of an item with a data type, an identifier set by the operator means a string of characters with a length of at least one character, where the content is set by the operator in accordance with the other requirements for the respective item of the record.</p> <p>The maximum length of a string may be limited in the definition of the item. Unless expressly stated otherwise, a shorter string is not supplemented to the maximum length.</p> <p>If no other requirements for uniqueness are set up for an item of records with data type identifier, the value of this item shall uniquely identify the record whenever it is provided in the automated data output. The same value shall not be used in case of two different records stated in the respective data file, even in the case when these are provided in automated data output for different time period or for other type of gambling. In case of repeatedly provided record in automated data output for different time period, the same value as when first provided shall be used for the item of this record with data type identifier.</p>
Reference link	<p>Reference to another entry identified by means of that entry's identifier.</p> <p>In the description of the item with the reference link, the entry referred to by the reference link shall be identified using the name of the data file, identified as a remote data file, and the machine file name, identified as a remote item.</p> <p>The requirements for the data type reference link are the same as those for the data type identifier.</p>

Subsection 3

Content of the automated data output for remote access

Operators shall deliver the gambling and financial data in a data file forming the automated data output for remote access.

The automated data output for remote access shall contain only gambling and financial data for the operator, reporting period and type of gambling identified in the name of the data file containing this data output.

In the data files of the automated data output for remote access, the metadata item of the interface version shall state: **1.0**

The data file shall contain the following data files:

Data file I

Operator data

Data file name:

provovatel.csv

Data file content:

The data file shall contain exactly one entry with data identifying the operator delivering the automated data output for remote access, regardless of whether these data were already provided in a data file providing remote access to data for another period.

Conditions for including the data file in the data file:

The data file shall always be included.

Entry items:

Item 1

Operator identifier

Machine file name:

IDProvovatel

Data type:

Identifier with a maximum length of 20 characters

Item description:

The identification number of operator providing automated data output for remote access, or, if the identification number of the operator has not been assigned to the operator, the operator's own number assigned to operator in connection with issuance of the basic licence. Leading zeros shall also be included if they are contained in the operator's identification number or operator's own number.

Item 2

Name or business name of operator

Machine file name:

ProvozovatelNazev

Data type:

Text with a maximum length of 250 characters

Item description:

The name or the business name of the operator stated in the business register or other similar register of the state where the operator is seated shall be stated.

Data file II

Information about the user account of the gambling participant

Data file name:

konto.csv

Data file content:

The data file contains user account information of a gambling participant established under the Gambling Act as a permanent or a temporary user account enabling a gambling, for which an automated data output for remote access is provided; regardless the data has already been provided in a data file containing an automated data output for another period.

One record is required for each user account.

Conditions for including the data file into data package:

The data file shall always be included.

Entry items:

Item 1

User account identifier

Machine file name:

IDUzivKonto

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided into two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: String specified by the operator.

In case that gambling participant is allowed to gamble through multiple identical gambling accounts, the same user account identifier shall be provided for this user account in all automated data outputs.

Item 2

Operator

Machine file name:

IDProvozovatel

Data type:

Reference link with a maximum length of 20 characters

Item description:

Identifier of the operator providing automated data output for remote access.

Remote access file: provozovatel.csv

Remote item: IDProvozovatel

Item 3

Date and time of setting up a user account

Machine file name:

ZrizeniCas

Data type:

Date and time

Item description:

The date and time of setting up a user account shall be stated.

Data file III

Information about the parameters of user account

Data file name:

konto_zmeny.csv

Data file content:

The data file shall contain information about the parameters of the newly set up gambling user account and entries on its changes for the type of gambling and for the period covered by the given automated data output for remote access.

When delivering the automated data output for the first time, the data file shall contain entries on all parameters currently set for the user accounts used by the gambling participants to be able to participate in the gambling for which the automated data output is being provided.

Conditions for including the data file in the data file:

Data file shall always be included.

Entry items:

Item 1

User account record identifier

Machine file name:

IDZaznamUzivKonto

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: String specified by the operator.

Item 2

User account

Machine file name:

IDUzivKonto

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of user account of which the change of the user account parameter concerns.

Remote data file: konto.csv

Remote item: IDUzivKonto

Item 3

Type of gambling

Machine file name:

HraDruh

Data type:

Text with length of 1 character

Item description:

Single-letter identification of the type of gambling to which the user account is set up.

It shall be stated:

L – lottery

K – odds betting

R – totalizator game

B – bingo

T – technical game

Z – live game

Item 4

Allowance to participate in gambling not operated as an online game

Machine file name:

Landbased

Data type:

Binary value

Item description:

Information on whether it is allowed to participate through the user account in the type of gambling specified in item HraDruh not operated as an online game.

It shall be stated:

0 – participation in gambling not provided as an online game is not allowed

1 – participation in gambling not provided as an online game is allowed

Item 5

Allowance to participate in online game

Machine file name:

Internet

Data type:

Binary value

Item description:

Information on whether it is allowed to participate through the user account in the type of gambling specified in item HraDruh operated as an online game.

It shall be stated:

0 – participation in online game is not allowed

1 – participation in online game is allowed

Item 6

The mode of user account

Machine file name:

DocasneTrvale

Data type:

Text with maximum length of 1 character

Item description:

The mode in which the user account shall be maintained.

It shall be stated:

D – temporary user account

T – permanent user account

Item 7

Date and time of the user account parameter change

Machine file name:

ZmenaCas

Data type:

Date and time

Item description:

Date and time of the user account parameter change shall be stated.

The first time the automated data output is provided, the date and time at which the current user account parameter setting was provided shall be stated.

Data file IV

Information about the location where the gambling is operated

Data file name:

misto.csv

Data file content:

The data file shall contain information about the location where the operation of the gambling, for which the automated data output for remote access is being provided, has started; regardless these data have already been provided in a data file containing the automated data output for another period.

Conditions for including the data file in the data file:

The data file shall be included only when providing gambling and financial data on

1. a lottery,
2. odds betting,

3. a totalisator game, or
4. a technical game.

Entry items:

Item 1

Identifier of gambling premises, point of sale, or a betting office

Machine file name:

IDMisto

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: String specified by the operator.

When multiple gambling is operated in a single gambling premises, point of sale, or betting office, the same identifier, including automated daily gambling reporting output or daily gambling log, is used in all automated data output provided by the operator.

Item 2

Operator

Machine file name:

IDProvozovatel

Data type:

Reference link with a maximum length of 20 characters

Item description:

Identifier of the operator providing the automated data output for remote access.

Remote data file: provozovatel.csv

Remote item: IDProvozovatel

Item 3

Longitude of gambling premises, point of sale, or a betting office

Machine file name:

GPSX

Data type:

A decimal number of at least 4 and a maximum of 7 decimal places

Item description:

In the case where SidloKodRuian is blank (NULL), the degrees east longitude (X-axis) in the WGS 84 coordinate system are specified as the address of the gambling premises, point of sale, or the betting office.

If the longitude of the gambling premises, point of sale, or betting office was stated in this record provided in the previously provided automated data output, the longitude is included of the gambling premises, point of sale, or betting office shall be stated even if the item SidloKodRuian is not blank (NULL).

In other cases, a blank entry (NULL) shall be stated.

Item 4

Latitude of gambling premises, point of sale, or a betting office

Machine file name:

GPSY

Data type:

A decimal number of at least 4 and a maximum of 7 decimal places

Item description:

In the case where SidloKodRuian is blank (NULL), the degrees north latitude (Y-axis) in the WGS 84 coordinate system are specified as the address of the gambling premises, point of sale, or the betting office.

If the latitude of the gambling premises, point of sale, or betting office was stated in this record provided in the previously provided automated data output, the latitude is included of the gambling premises, point of sale, or betting office shall be stated even if the item SidloKodRuian is not blank (NULL).

In other cases, a blank entry (NULL) shall be stated.

Item 5

Type of location where the gambling is operated

Machine file name:

TypMisto

Data type:

A text with a maximum length of 2 characters

Item description:

One-letter or two-letter identification of the type of location where gambling is performed by an operator providing automated data output.

It shall be stated:

H – gambling premises

K – casino if it provides a technical game not operated as an online game

P – point of sale if it provides a lottery

S – betting office if it provides odds betting not operated as online game or totalizator game not provided as online game

PS – a betting office and point of sale if it provides odds betting not operated as online game or totalizator game not operated as online game and lottery not operated as online game

Type of location where a gambling is operated shall not be changed. If the type of location where gambling is operated has changed, a new entry stating another identifier in item IDMisto shall be stated.

Item 6

Address or name of other public location

Machine file name:

Ulice

Data type:

A text with a maximum length of 250 characters

Item description:

The address or other public location in which the address of the gambling premises, point of sale or betting office is located shall be stated.

In case the address or other public location is not applied, a blank entry (NULL) shall be stated.

Item 7

House number or registration number

Machine file name:

CP

Data type:

Integer

Item description:

The house number or registration number of the address of the gambling premises, point of sale or betting office shall be stated.

In case the house number or the registration number is not applied, a blank entry (NULL) shall be stated.

Item 8

Reference number

Machine file name:

CO

Data type:

A text with a maximum length of 10 characters.

Item description:

The reference number with an addendum, if applicable, of the address of the gambling premises, point of sale, or betting office shall be stated.

In case the reference number is not applied, a blank entry (NULL) shall be stated.

Item 9

Part of municipality

Machine file name:

Cast0bce

Data type:

A text with a maximum length of 250 characters.

Item description:

Where gambling premises, a point of sale, or a betting office is located in the territory of a municipality divided into city quarters or city districts, the name of the city quarter or city district in whose territory their place of destination is located shall be stated.

In case a gambling premises, a point of sale, or a betting office is located in the territory of the capital city of Prague, the name of the cadastral territory where the address is located shall be stated.

In other cases, a blank entry (NULL) shall be stated.

Item 10

Postal Code

Machine file name:

PSC

Data type:

Integer

Item description:

The postal code of the address of a gambling premises, a point of sale, or a betting office shall be stated.

Item 11

Municipality

Machine file name:

Obec

Data type:

A text with a maximum length of 250 characters

Item description:

The part of municipality of the address of the gambling premises, point of sale, or betting office shall be stated.

Item 12

District number of the capital city of Prague

Machine file name:

Obvod

Data type:

Integer

Item description:

The district number of the capital city of Prague in accordance with Act on territorial state division, in which is placed the address of the gambling premises, point of sale, or betting office.

In case the address of the gambling premises, point of sale, or betting office is not place in the territory of the capital city of Prague, a blank entry (NULL) shall be stated.

Item 13

Region

Machine file name:

Kraj

Data type:

A text with a length of 3 characters

Item description:

A three-letter marking of the region in which the address of the gambling premises, the point of sale, or the betting office is located.

It shall be stated:

PHA - Capital City of Prague

STC - Central Region

JHC - South Bohemian Region

PLK - Pilsen Region

ULK - Ústí nad Labem Region
LBK - Liberec Region
HKK - Hradec Kralove Region
PAK - Pardubice Region
VYS - Vysočina Region
JHM - South Moravian Region
OLK - Olomouc Region
MSK - Moravskoslezský kraj
ZLK - Zlin Region

Item 14

Code for address of gambling premises, point of sale, or a betting office

Machine file name:

SidloKodRuian

Data type:

Integer

Item description:

The code for address of gambling premises, point of sale, or betting office assigned to these gambling premises in the basic register of territorial identification, addresses and real estates shall be stated.

In case the code for address is not assigned to the address of gambling premises, point of sale, or betting office, a blank entry (NULL) shall be stated.

Data file V

Data on gambling position of the terminal device of technical game

Data file name:

herni_pozice.csv

Data file content:

The data file shall contain data on the gambling position of the terminal device of technical game operated by the operator regardless these data have been provided in the data package including automated data output for another period.

Conditions for including the data file in the data file:

Data file shall be included only when providing gambling and financial data on the technical game.

Entry items:

Item 1

Identifier of the gambling position of the terminal device of technical game

Machine file name:

IDHerniPozice

Data type:

An identifier with a maximum length of 50 characters.

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: The serial number of the terminal device of technical game as listed in the gambling premises location license

Item 2

Gambling premises

Machine file name:

IDMisto

Data type:

Reference link with a maximum length of 50 characters

Item description:

The identifier of the gambling premises where the gambling position of the terminal device of technical game is operated.

Remote data file: misto.csv

Remote item: IDMisto

Item 3

Operator

Machine file name:

IDProvozovatel

Data type:

Reference link with a maximum length of 20 characters

Item description:

The identifier of operator providing automated data output for remote access.

Remote data file: provozovatel.csv

Remote item: IDProvozovatel

Data file VI
Details of the gambling

Data file name:

evidence_her.csv

Data file content:

The data file shall contain the details of gambling where the operation of which was permitted by basic license during the reporting period.

In the case where the basic license to operate the same technical game in multiple variants, i.e. in different currencies or as an online game and as a game not operated as an online game, has been permitted in the reporting period, separate technical games shall be included in separate records.

Data is reported regardless of whether it has already been provided in a data file containing an automated data output for another period.

Conditions for including the data file in the data file:

The data file shall always be included.

Entry items:

Item 1

Identifier of gambling

Machine file name:

IDHraPopis

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

Name of gambling

Machine file name:

HraNazev

Data type:

Text with a maximum length of 250 characters

Item description:

The name of the gambling shall be stated in the form of the basic permission regardless of the language and the font.

In the case of an additional lottery, the name of the additional lottery followed by the name of the lottery in which the additional lottery is operated shall be stated.

In the case of a technical game, the name of the pack game or the currency code in which the bets are placed in the technical game shall be stated together with the name of the technical game, if the operator operates more technical games with the same name.

In the case where the name of the gambling is not given in the basic permission, the name of the type of gambling according to the Gambling Act shall be stated.

Item 3

Type of gambling

Machine file name:

HraDruh

Data type:

Text with a length of 1 character

Item description:

Single-letter identification of the type of gambling.

It shall be stated:

L – lottery

K – odds betting

R – totalizator game

B – bingo

T – technical game

Z – live game

Item 4

Category of gambling

Machine file name:

HraKategorie

Data type:

Text with a length of 1 character

Item description:

Single-letter identification of the category of gambling.

It shall be stated:

- a** - numerical lottery
- b** - instant win lottery
- c** - in-kind prize lottery
- d** - cash prize lottery
- e** - odds betting
- f** - totalizator game
- g** - bingo operated as an online game (hereinafter referred to as the 'online bingo')
- h** - technical game
- i** - live game operated as an online game (hereinafter referred to as the 'online live game') in which gambling participants and, where applicable, non-national participants play against each other and are not run in the form of a tournament
- j** - online live game played in the form of a tournament (hereinafter referred to as the 'online live game tournament')
- k** - online live game where participants play against the software gambling system

Item 5

Operator

Machine file name:

IDProvozovatel

Data type:

Reference link with a maximum length of 20 characters

Item description:

Identifier of the operator providing automated data output for remote access.

Remote data file: provozovatel.csv

Remote item: IDProvozovatel

Item 6

Date and time of beginning of the game of gambling

Machine file name:

SpusteniCas

Data type:

Date and time

Item description:

The date and time of beginning of the game of gambling shall be stated.

Data file VII
Details of the game of gambling

Data file name:

jedna_hra.csv

Data file content:

The data file shall contain the details of a draw in a numerical, in-kind prize, cash prize or additional lottery, the emission of instant win lottery, a game of a totalisator game, a game of online bingo and a game or tournament of an online live game.

The operator shall provide the entry on the game in the automated data output for the period in which bets on that game of gambling were open for the first time. If any value entered under the item changes due to the fact that the item was not known at the moment the entry was provided for the first time, the entire entry shall be provided again with the current values in the automated data output for remote access for the period when the value of that entry under the item changed.

Conditions for including the data file in the data file:

The data file shall be included only when providing gambling and financial data on

1. lottery,
2. totalisator game,
3. online bingo or
4. online live game.

Entry items:

Item 1
Identifier of game

Machine file name:

IDJednaHra

Data type:

Identifier with maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

Gambling

Machine file name:

IDHraPopis

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of gambling of which the data concerns.

Remote data file: evidence_her.csv

Remote item: IDHraPopis

Item 3

Date and time of the beginning of the game of gambling

Machine file name:

HraZahajeniCas

Data type:

Date and time

Item description:

The estimated time of the beginning of the game of gambling shall be stated.

Item 4

The amount of deposit limitation

Machine file name:

HraOmezeniVkladu

Data type:

Text with a maximum length of 250 characters

Item description:

If the item HraKategorie in the entry of data file evidence_her.csv is listed the "i" or "k" entry linked through the reference link IDHraPopis, the entry on deposit limits together with the code of the currency in which the deposit is accepted and what data is involved, shall be stated.

For other categories of gambling, or if the amount of deposit limitation has not been set, a blank entry (NULL) shall be stated.

Item 5

The manner of raising the bets

Machine file name:

ZpusobZvysovaniSazek

Data type:

Text with a maximum length of 250 characters

Item description:

If the item HraKategorie in the entry of data file evidence_her.csv is the "i" entry linked through the reference link IDHraPopis, the manner of raising the deposits into the online live game shall be stated, if specified.

If the item HraKategorie in the entry of data file evidence_her.csv is the "j" entry linked to the reference link in the item IDHraPopis, the manner of raising the mandatory online live game tournament bets shall be stated, if specified.

For other categories of gambling, or if manner of raising bets has not been set, a blank entry (NULL) shall be stated.

Item 6

Fixed bets on a single betting ticket, mandatory deposit to play online live game or deposit into an online live game tournament

Machine file name:

PovinnyVkladVyse

Data type:

Text with a maximum length of 250 characters

Item description:

The amount of the bet for one betting ticket

If the item HraKategorie in the entry evidence_her.csv linked to the reference link in the item IDHraPopis is "g", the bet amount is specified for one betting ticket and the currency code where the bet is accepted.

The amount of the mandatory deposit into the game of online live game

If the item HraKategorie in the data file evidence_her.csv linked through the reference link in the item IDHraPopis, the amount of the mandatory deposit in the game of the online live game and the currency code of the value cheques in which a deposit in the game of online live game is paid.

The amount of the deposit to the online live game tournament

If the item HraKategorie in the data file evidence_her.csv linked through the reference link in the item IDHraPopis is "j", the amount of the deposit to the online live game tournament and the currency code in which the deposit is online live poker tournaments.

In the case of other categories of gambling, a blank entry (NULL) shall be stated.

Item 7

Identification of gambling capital of lottery or method of determination of winning capital of tournament of online live game

Machine file name:

JistinaUrceni

Data type:

Text with a maximum length of 250 characters

Item description:

If the item HraKategorie in the data file evidence_her.csv data linked through the reference link in the item IDHraPopis is "a", the identification of gambling capital of numerous lotteries by its name or other manner enabling to identify the specific gambling deposit of numerous looters from which the winnings from this drawing shall be paid.

If the item HraKategorie in the data file evidence_her.csv data linked through the reference link in the item IDHraPopis is "j", the method of determination of winning capital from the total amount of all deposits into this tournament of online life game and the amount of guaranteed winning capital, if stated, together with information about the data.

In the case of other categories of gambling, a blank entry (NULL) shall be stated.

Item 8

The right to win and the method of determining its amount

Machine file name:

NarokVyhra

Data type:

Text with a maximum length of 250 characters

Item description:

If the item "HraKategorie" in the entry of data file evidence_her.csv linked through the reference link in the item IDHraPopis is "j", the data as to when the claim to the winning arises in terms of the winning placement and the method of winning determination in this online live game tournament shall be stated.

If the item "HraKategorie" in the entry of data file evidence_her.csv linked through the reference link in the item IDHraPopis is "f", the predetermined allocation of winnings and data as to when the claim to a winning arises in terms of the winning placement and the method of winning determination in this totalizator game shall be stated.

In the case of other categories of gambling, a blank entry (NULL) shall be stated.

Item 9

The result of gambling

Machine file name:

HraVysledek

Data type:

Text with a maximum length of 250 characters

Item description:

If the item "HraKategorie" in the data file evidence_her.csv data linked through the reference link in the item IDHraPopis is "a" or "g ", the result of drawing shall be stated.

If the item "HraKategorie" in the data file evidence_her.csv data linked through the reference link in the item IDHraPopis is "k", the result of game online life game as gambling combination which is common for all participants of the respective online life game shall be stated.

In the case of other categories of gambling, or if no result was stated yet, a blank entry (NULL) shall be stated.

Item 10

The participation of the foreign participant in game of gambling

Machine file name:

ZahranicniUcast

Data type:

Binary value

Item description:

If the item "HraKategorie" in the data file evidence_her.csv data linked through the reference link in the item IDHraPopis is "g", "i" or "j ", the information on whether person participate in the game of gambling other than the participant who has registered or paid a deposit to and who is not resident in the Czech Republic (hereinafter referred to as the 'foreign participant').

It shall be stated:

0 – if the participants of the gambling were involved in the game of gambling only

1– if at least one foreign participant was involved in the game of gambling

If bets into gambling were not completed and game of gambling may involve at least one foreign participant, a blank entry (NULL) shall be stated.

In the case of other categories of gambling, a blank entry (NULL) shall be stated.

Data file VIII

The data provided for online live game tournament

Data file name:

turnaj_detaily.csv

Data file content:

The data file shall contain the data to be provided for an online live game tournament.

The entry on the online live game tournament shall be provided by the operator in the automated data output for the period in which deposits for the online live game tournament could be placed for the first time. If any value entered under the item changes due to the fact that the item was not known at the moment the entry was provided for the first time, the entire entry shall be provided again with the current values in the automated data output for remote access for the period when the value of that entry under the item changed.

Conditions for including the data file in the data file:

The data file shall be included only when providing gambling and financial data on an online live game operated in the form of a live game tournament.

Entry items:

Item 1

Entry identification with data on online live game tournament

Machine file name:

IDTurnajDetaily

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

Gambling

Machine file name:

IDJednaHra

Data type:

Reference link with maximum length of 50 characters

Item description:

Identifier of gambling of which the data concerns.

Remote data file: jedna_hra.csv

Remote item: IDJednaHra

Item 3

Interval of raising bets for online live game tournament

Machine file name:

TurnajIntervalZvysovani

Data type:

Text with a maximum length of 250 characters

Item description:

The interval for increasing the level of the required bets in the online live game tournament shall be stated.

Item 4

The method of holding the online live game tournament

Machine file name:

TurnajZpusobKonani

Data type:

Text with maximum length of 250 characters

Item description:

The method of holding the online live game tournament shall be stated.

Item 5

Registration for online live game tournament

Machine file name:

TurnajRegistrace

Data type:

Text with a maximum length of 250 characters

Item description:

The registration details and the deadline for logging into the online live game tournament shall be stated.

Item 6

Participants deposits accepted before the start of online life game tournament

Machine file name:

TurnajVkladyPredZahajenimVyse

Data type:

Decimal number

Item description:

The total of all participants' deposits that had been accepted by the operator before the start of online live game tournament shall be stated.

If the online live game tournament has not yet started, a blank entry (NULL) shall be stated.

Item 7

Maximum number of participants of online live game tournament

Machine file name:

TurnajMaxPocetUcastnici

Data type:

Integer

Item description:

A maximum number of participants shall be stated, if determined.

If a maximum number of participants is not determined, a blank entry (NULL) shall be stated.

Item 8

Currency code

Machine file name:

MenaKod

Data type:

Text with a length of 30 characters

Item description:

A currency code that was accepted for participants' deposits of online live game tournament shall be stated.

Data file IX

The data on betting event

Data file name:

udalost.csv

Data file content:

The data file shall contain the details of the sport event or event of public interest, the outcome of which is the subject of betting (hereinafter referred to as the 'betting event').

The operator shall provide the entry on the betting event in the automated data output for the period in which bets were first accepted on the betting opportunity opened for the betting event. If any value entered under the item changes due to the fact that the item was not known at the moment the entry was provided for the first time, the entire entry shall be provided

again with the current values in the automated data output for remote access for the period when the value of that entry under the item changed.

Entries relating to the main betting event, to which a partial betting event is linked, shall be placed before the entry relating to the partial betting event in the data file.

Conditions for including the data file in the data file:

The data file shall be included only when providing gambling and financial data on

1. odds betting or
2. totalisator game.

Entry items:

Item 1

Identifier of betting event

Machine file name:

IDUdalost

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

Name or other identifier of betting event

Machine file name:

UdalostNazev

Data type:

Text with a maximum length of 500 characters

Item description:

The name or other identifier of the betting event allowing to identify the betting event unequivocally shall be stated.

Item 3

Type of gambling

Machine file name:

HraDruh

Data type:

Text with a length of 1 character

Item description:

Single-letter identification of the type of gambling to which the betting event is listed shall be stated:

K – odds betting

R – totalisator game

Item 4

Date and time of assumed start of betting event

Machine file name:

ZahajeniCas

Data type:

Date and time

Item description:

If the item IDHlavniUdalost is blank (NULL), the assumed date and time of start of the betting event shall be provided.

In all other cases, a blank entry (NULL) shall be stated.

Item 5

The result of betting event

Machine file name:

UdalostVysledek

Data type:

Text with a maximum length of 250 characters

Item description:

The result of the betting event shall be stated.

If the outcome of a betting event is not yet known, a blank entry (NULL) is to be entered.

Item 6

The main betting event

Machine file name:

IDHlavniUdalost

Data type:

Reference link with a maximum length of 50 characters

Item description:

The identifier of betting event, which is the main betting event, if the betting event included in this file is only partial element of the main betting event.

Remote Data File: udalost.csv

Remote Item: IDHlavniUdalost

If the betting event included in this entry is not a partial element of the main betting event, a blank entry (NULL) shall be stated.

Item 7

Operator

Machine file name:

IDProvozovatel

Data type:

Reference link with a maximum length of 20 characters

Item description:

Identifier of the operator providing automated data output for remote access.

Remote access file: provozovatel.csv

Remote item: IDProvozovatel

Data file X

The data on the betting opportunity

Data file name:

prilezitost.csv

Data file content:

The data file shall contain the details on the betting opportunity.

The operator shall provide the entry on the betting opportunity in the automated data output for the period in which the bets on that betting opportunity were allowed for the first time. If any value entered under the item changes due to the fact that the item was not known at the moment the entry was provided for the first time, the entire entry shall be provided again with the current values in the automated data output for remote access for the period when the value of that entry under the item changed.

Conditions for including the data file in the data file:

The data file shall be included only when providing gambling and financial data on

1. odds betting or
2. totalisator game.

Entry items:

Item 1

Identifier of betting opportunity

Machine file name:

IDPrilezitost

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

Name or other identifier of betting opportunity

Machine file name:

PrilezitostNazev

Data type:

Text with a maximum length of 500 characters

Item description:

The name or other identification of the betting opportunity allowing to identify the betting opportunity unequivocally shall be stated.

Item 3

Date and time to start betting on a betting opportunity

Machine file name:

ZahajeniPrijmuSazekCas

Data type:

Date and time

Item description:

Date and time to start betting on a betting opportunity shall be stated.

Item 4

Date and time to end betting on a betting opportunity

Machine file name:

UkonceniPrijmuSazekCas

Data type:

Date and time

Item description:

In the case of betting opportunity for an odds betting and the value '1' is stated in the item Live, the end date and time of collecting bets on the betting opportunity shall be stated.

In the case of betting opportunity for an odds betting and the value '0' is stated in the item Live, a blank entry (NULL) shall be stated.

In the case of the betting opportunity of totalisator game, the end date and time of collecting bets on the totalisator game shall be stated.

Item 5

Evaluation of betting opportunity

Machine file name:

Vyherni

Data type:

Text with a length of 1 character

Item description:

Evaluation of the betting opportunity by comparing it with the outcome of the betting event.

It shall be stated:

0 – the betting opportunity was evaluated as a loss

1 – the betting opportunity was evaluated as a winning

2 – all bets accepted for the betting opportunity were evaluated as invalid or cancelled in accordance with the game plan.

If the betting opportunity is yet to be evaluated, the blank entry (NULL) shall be stated.

Item 6

Betting event

Machine file name:

IDUdalost

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the betting event, for which a betting opportunity has been listed.

Remote data file: udalost.csv

Remote item: IDUdalost

Item 7

Identification of live odds betting

Machine file name:

Live

Data type:

Binary value

Item description:

In the case of betting opportunity of odds betting, the following shall be stated:

0 –if the betting opportunity was not opened for live odds betting

1–if the betting opportunity was opened for live odds betting

In the case of betting opportunity of totalizator game, a blank entry (NULL) shall be stated.

Data file XI

The data on an interruption and restriction on the acceptance of bets

Data file name:

preruseni_omezeni_kursova_toto.csv

Data file content:

The data file shall contain the details of any interruption or restriction on the acceptance of bets on a betting opportunity.

Exactly one entry shall be provided for every interruption or restriction on the acceptance of bets on a betting opportunity that occurred during the period covered by the automated data output. If any value entered under the item changes due to the fact that the item was not known at the moment the entry was provided for the first time, the entire entry shall be provided again with the current values in the automated data output for remote access for the period when the value of that entry under the item changed.

Conditions for including the data file in the data file:

The data file shall be included only when providing gambling and financial data on

1. odds betting or
2. totalisator game.

Entry items:

Item 1

Identifier of entry on interruption or restriction

Machine file name:

IDZaznamPrerusenioMezeni

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

Betting opportunity

Machine file name:

IDPrilezitost

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the betting opportunity for which the acceptance of bets was interrupted or limited.

Remote data file: prilezitost.csv

Remote item: IDPrilezitost

Item 3

Specific limitation of receiving bets

Machine file name:

OmezeniText

Data type:

Text with a maximum length of 250 characters

Item description:

If an interruption of the collection of bets on a betting opportunity is recorded, a blank entry (NULL) shall be stated.

If an introduction of restriction on the acceptance of bets on a betting opportunity is recorded, the details of the restriction shall be stated.

Item 4

Date and time of interruption or introduction of receiving bets limitation

Machine file name:

PrerusenizavedeniCas

Data type:

Date and time

Item description:

If interruption of the collection of bets on a betting opportunity is recorded, time of such interruption shall be stated.

If introduction of restriction on the acceptance of bets on a betting opportunity is recorded, time of introduction shall be stated.

Item 5

Date and time of the end of interruption or limitation of receiving bets

Machine file name:

UkonceniCas

Data type:

Date and time

Item description:

If an interruption of the acceptance of bets on a betting opportunity is recorded, the end date and time of the interruption shall be stated.

If a restriction on the acceptance of bets on a betting opportunity is recorded, the end date and time of the limitations in item OmezeniText shall be stated.

If there was no interruption or limitation of betting opportunity yet, the blank entry (NULL) shall be stated.

Data file XII
The data on odds of betting opportunity

Data file name:

prilezitost_kurs.csv

Data file content:

The data file shall contain odds data of the betting opportunity and any changes to the data that occurred during the period covered by the automated data output. Exactly one entry shall be provided for every change in the odds.

Conditions for including the data file in the data file:

The data file shall be included only when providing gambling and financial data on odds betting.

Entry items:

Item 1

Identifier of entry of odds of betting opportunity

Machine file name:

IDZaznamPrilezitostKurs

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

Betting opportunity

Machine file name:

IDPrilezitost

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the betting opportunity for which the odds were set.

Remote data file: prilezitost.csv

Remote item: IDPrilezitost

Item 3

Odds value

Machine file name:

KursVyse

Data type:

Decimal number with a maximum 3 decimal places

Item description:

The odds value set for the betting opportunity included in the file linked by reference link in the item IDPrilezitost.

Item 4

Date and time to determine the odds value

Machine file name:

KursCas

Data type:

Date and time

Item description:

Date and time to determine the odds value shall be stated.

Data file XIII

The data on odds betting ticket

Data file name:

tiket.csv

Data file content:

The data file shall contain the details of every entry on one or more odds betting placed at the same moment (hereinafter referred to as the 'odds betting ticket') that were accepted or rejected during the period covered by the automated data output.

Conditions for including the data file in the data file:

The data file shall be included only when providing gambling and financial data on odds betting.

Entry items:

Item 1

Identifier of odds betting ticket

Machine file name:

IDTiket

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

User account

Machine file name:

IDUzivKonto

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the user account, which was used to place the odds betting.

Remote data file: konto.csv

Remote item: IDUzivKonto

If this is a odds betting for an animal race and if no user account was set up for the participant, a blank entry (NULL) shall be stated.

Item 3

The method of closure of odds betting

Machine file name:

ZpusobUzavreni

Data type:

Text with a maximum length of 50 characters

Item description:

The method of closure of the odds betting shall be stated.

Item 4

Date and time of closure, or refusing the acceptance of odds betting

Machine file name:

UzavreniCas

Data type:

Date and time

Item description:

If the item TiketOdmitnuti in this data file includes the value '0', the date and time when the odds betting was closed, meaning the date and time of acceptance of the odds betting or bets, shall be stated.

If the item TiketOdmitnuti in this data file includes the value '1', the date and time when the odds betting was refused, meaning the date and time when the odds betting or bets were received, shall be stated.

Item 5

Betting office

Machine file name:

IDMisto

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the betting office where the bet, or part thereof, was accepted.

Remote data file: misto.csv

Remote item: IDMiston

In case of online odds betting, a blank entry (NULL) shall be stated.

Item 6

The entry on refusing the acceptance of odds betting ticket

Machine file name:

TiketOdmItnuti

Data type:

Binary value

Item description:

Information as to whether the operator refused to accept the odds betting ticket.

It shall be stated:

0 – the odds betting ticket was accepted by the operator.

1 – the odds betting ticket was rejected by the operator

Item 7

The reason to refuse bet, or part thereof

Machine file name:

OdmItnutiDuvod

Data type:

Text with a maximum length of 250 characters

Item description:

If the item TiketOdmItnuti includes the value '1', the reason for rejection of the ticket shall be stated.

If the item TiketOdmItnuti includes the value '0', a blank entry (NULL) shall be stated.

Data file XIV

The data on betting event in a totalisator game

Data file name:

toto_udalost.csv

Data file content:

The data file shall contain an overview of the betting events in a totalisator game.

Exactly one entry shall be provided for every betting event, bets on the result of which can be placed in a totalisator game and the operator shall include it in the automated data output for the period in which bets on the totalisator game were accepted for the first time.

Conditions for including the data file in the data file:

The data file shall be included only when providing gambling and financial data on a totalisator game.

Entry items:

Item 1

Identifier of entry on betting event in a game of totalisator game

Machine file name:

IDZaznamTotoUdalost

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator

Item 2

Game of totalisator game

Machine file name:

IDJednaHra

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the round of the totalisator game, for which the betting event linked by reference link included in the item IDUdalost.

Remote data file: jedna_hra.csv

Remote item: IDJednaHra

Item 3

Odd event

Machine file name:

IDUdalost

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the betting event, bets on which can be accepted as part of the totalisator game included in the data file jedna_hra.csv linked through reference link to the item IDJednaHra.

Remote data file: udalost.csv

Remote item: IDUdalost

Data file XV

The data on link between gambling and bet, part of the bet or foreign deposit into this game

Data file name:

vazba_hra_sazka.csv

Data file content:

The data file shall contain a link between gambling and bet, part of the bet or foreign deposit into this game.

The entry shall be included in the automated remote access output for the period in which the bet, part of the bet or foreign deposit has been accepted to which the file is linked by the reference link IDHraToky included in this file.

Conditions for including the data file in the data file:

Data file shall always be included.

Entry items:

Item 1

Identifier of link between gambling and bet, part of the bet or foreign deposit into this game

Machine file name:

IDVazbaHraSazka

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator

Item 2

Gambling

Machine file name:

IDHraPopis

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the gambling, to which the bet, part thereof or foreign deposit were accepted.

Remote data file: evidence_her.csv

Remote item: IDHraPopis

Item 3

Gambling

Machine file name:

IDJednaHra

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the gambling, to which the bet, part thereof or foreign deposit were accepted.

Remote data file: jedna_hra.csv

Remote item: IDJednaHra

If the item HraDruh in the data file named hra_toky.csv linked by reference link to the item IDHraPopis contains the value 'K' or 'T', a blank entry (NULL) shall be stated.

Item 4

Odds, part thereof, or foreign deposit

Machine file name:

IDHraToky

Data type:

Reference link with a maximum length of 50 characters

Item description:

If a "K" or "T" is stated in the item HraDruh in the evidence_her.csv data file linked through the reference link included in the item IDHraPopis, the bet identifier, part or foreign contribution which has been accepted into round of game stated in the data file hra_toky.csv linked by v the reference link included in IDHraPopis.

Remote data file: hra_toky.csv

Remote item: IDHraToky

In other cases, the identifier of the bet, or part thereof, that was accepted into game of gambling stated in the file jedna_hra.csv linked through the reference link in IDJednaHra shall be stated.

In other cases, the identifier of the bet, or a portion thereof, that has been accepted into the game of gambling specified in the entry in the one_hra.csv data file bound by the reference binding specified in IDJednaHr shall be stated.

Remote data file: hra_toky.csv

Remote Item: IDHraToky

Data file XVI

The data on the basic gambling and financial data of gambling

Data file name:

hra_toky.csv

Data file content:

The data file includes basic gambling and financial data about the bet or part of it, admitted to the round of gambling. In the case of online bingo, an online live game in which gambling participants and possibly foreign participants play against each other and which is not run in the form of a tournament or tournament of the online live game, the data file shall also include the basic gambling and financial data of the deposit of a foreign participant (hereinafter referred to as the 'foreign deposit').

The item related to a bet or a part of it or a foreign deposit is first provided in an automated remote access exit during the period in which the bet, part or deposit was accepted in its original amount. In the event that a value of a record item is changed because the item was not known at the time of the first providing of the record, the whole entry item with the current values shall be provided again in the automated remote access output during the period during which the change occurred.

Conditions for including the data file in the data file:

Data file shall always be included.

Entry items:

Item 1

Identifier of odds, part thereof, or foreign deposit

Machine file name:

IDHraToky

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator

Item 2

Type of gambling

Machine file name:

HraDruh

Data type:

Text with a maximum length of 1 character

Item description:

The type of gambling, for which the bet stated in the item IDHraToky was accepted.

It shall be stated:

- L** – lottery.
- K** – odds betting.
- R** – totalisator game.
- B** – bingo.
- T** – technical game.
- Z** – live game.

Item 3

Category of gambling

Machine file name:

HraKategorie

Data type:

Text with a maximum length of 1 character

Item description:

The type of gambling, for which the bet stated in the item IDHraToky was accepted.

It shall be stated:

- a** – number lottery.
- b** – instant lottery.
- c** – in-kind lottery.
- d** – monetary lottery.
- e** – odds betting

f – totalisator game.

g – online bingo.

h – technical game.

i – online live game, in which the participants or foreign participants play against each other and which is not operated in the form of a tournament.

j – online live game tournament.

k – online live game, in which the participants play against a software gambling system.

Item 4

User account

Machine file name:

IDUzivKonto

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the user account of the gambling participant who placed a bet on the gambling specified in the item IDHraToky in this data file.

Remote data file: konto.csv

Remote item: IDUzivKonto

If the bet for the round of the gambling was paid by a foreign participant, a blank entry (NULL) shall be stated.

If this is a odds betting for an animal race or if no user account was set up for the gambling participant, a blank entry (NULL) shall be stated.

Item 5

Odds amount, or part thereof

Machine file name:

SazkaVysePuvodni

Data type:

Decimal number

Item description:

The amount of the bet or part thereof

The amount of the bet, or part thereof, that the gambling participant has put into the game of gambling shall be stated.

If 'i' is stated in the item HraKategorie and the gambling participant participates in the game only as a card dealer without subsequently placing a bet, a blank entry (NULL) shall be stated.

If the gambling is classified under category 'e', the amount of the bet or part thereof that was accepted or rejected shall be provided.

Foreign deposit amount

If 'g', 'i' and 'j' is stated in the item HraKategorie and if the item IDUzivKonto is blank (NULL), the amount of the foreign deposit identified by the entry under the item shall be stated.

Item 6

Date and time receiving bet, part thereof of foreign deposit

Machine file name:

SazkaPrijetiCas

Data type:

Date and time

Item description:

Date and time of acceptance of the bet, or part thereof

The date and time when the bet was accepted in the original amount.

If the gambling is classified under category 'e', the date and time when the bet was accepted or rejected in the original amount shall be provided.

Date and time of acceptance of a foreign deposit

The date and time when the foreign deposit was accepted or rejected in the original amount shall be stated.

In the case of the HraKategorie item, the value of "i" and the gambling participant participating in the game only in terms of handing out the cards without placing a bet in the game, the date and time of the start of the game concerned shall be stated.

Item 7

The amount of accompanying supply, or its proportionate part

Machine file name:

DoprovodnePlneniVysePuvodni

Data type:

Decimal number

Item description:

The amount of accompanying supply, or its proportionate part, which the gambling participant is required to pay in addition to the bet to be allowed to participate in a specific round of the given type of a gambling (hereinafter referred to as the 'accompanying supply') and which was received together with the bet or part thereof.

If category 'g', 'i' and 'j' is stated in the item HraKategorie and in the item IDUzivKonto is blank (NULL), or if no accompanying supply is provided, a blank entry (NULL) shall be stated.

Item 8

Date and time of receiving the accompanying supply, or its proportionate part

Machine file name:

DoprovodnePlneniCas

Data type:

Date and time

Item description:

Date and time of receiving the accompanying supply, or its proportionate part shall be stated.

If category 'g', 'i' and 'j' is stated in the item HraKategorie and in the item IDUzivKonto is blank (NULL), or if no accompanying supply is provided, a blank entry (NULL) shall be stated.

Item 9

Game combinations

Machine file name:

SazkaHerniKombinace

Data type:

Text with a maximum length of 250 characters

Item description:

If 'a' is stated in the item HraKategorie, the details deciding whether a claim for winnings has arisen shall be stated.

If 'k' is stated in the item HraKategorie, the result of the online live game in terms of the game combination common for all participants in that particular online live game shall be provided.

If the gambling falls under one of the other categories or if the value is yet to be set, a blank entry (NULL) shall be stated.

Item 10

The amount of winnings claimed

Machine file name:

VyhraVyseNarok

Data type:

Decimal number

Item description:

If 'a', 'c', 'd', 'e' or 'f' a' is stated in the item HraKategorie, the amount of the winning that can be claimed by the bettor shall be stated. If the bet is yet to be evaluated, a blank entry (NULL) shall be stated.

If the gambling falls under one of the other categories, a blank entry (NULL) shall be stated.

Item 11

The amount of winnings paid or foreign winning

Machine file name:

VyhraVysePuvodni

Data type:

Decimal number

Item description:

Amount of the winning paid out

The winning amount claimed by and paid out to the gambling participant on the basis of the bet shall be stated.

If the winning is yet to be paid out, a blank entry (NULL) shall be stated.

In the case of loss, 0 shall be stated.

If 'i' is stated in the item HraKategorie and the gambling participant participates in the game only as a card dealer without subsequently placing a bet, a blank entry (NULL) shall be stated.

Amount of winning paid out to the foreign participant (hereinafter referred to as the 'foreign winning')

If "g", "i" and "j" is stated in the item HraKategorie and if the item IDUzivKonto is blank (NULL), the amount of the foreign winning on which the foreign participant claimed based on foreign deposit, shall be stated.

If the foreign winning is yet to be paid out, a blank entry (NULL) shall be stated.

Item 12

Date and time of winnings paid to the gambling participate or foreign winning

Machine file name:

VyhraVyslaceniCas

Data type:

Date and time

Item description:

Date and time when the winning was paid out to the gambling participant

The date and time when the winning was paid out to the gambling participant shall be stated.

In the case of loss, its date and time shall be stated.

If the winning is yet to be paid out, a blank entry (NULL) shall be stated.

Date and time when the foreign winning was paid out

The date and time when the foreign winning was paid shall be stated.

In the case of loss, its date and time shall be stated.

If the foreign winning is yet to be paid out, a blank entry (NULL) shall be stated.

Item 13

Currency code

Machine file name:

MenaKod

Data type:

Text with a length of 3 characters

Item description:

The code of currency in which was bet or part thereof received.

Item 14

Point of sale, betting office or gambling premises

Machine file name:

IDMisto

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the point of sale, betting office or gambling premises where the bet was accepted.

Remote data file: misto.csv

Remote item: IDMisto

In case of online game, a blank entry (NULL) shall be stated.

Item 15

Gambling position of the terminal device of technical game

Machine file name:

IDHerniPozice

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the gambling position of the terminal device of technical game used by the participant to participate in the technical game, if the gambling is classified under category 'h' and if terminal device of technical game placed in a gambling premises is used for participation:

Remote data file: herni_pozice.csv

Remote item: IDHerniPozice

In all other cases, a blank entry (NULL) shall be stated.

Data file XVII

The data on the next gambling and financial data by the joint lottery

Data file name:

sdileni.csv

Data file content:

The data file shall include other gambling and financial data on joint lottery.

The entry shall be provided for the first time in the automated data output for remote access for the period in which a total of deposits were received from a joint gambling capital or a total of deposits were provided to a joint gambling capital.

Conditions for including the data file in the data file:

Data file shall be included only when providing gambling and financial data on lottery.

Entry items:

Item 1

Entry identifier on transaction regarding the shared gambling capital

Machine file name:

IDSdileni

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator

Item 2

Game of gambling

Machine file name:

IDJednaHra

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the game of gambling identifying the lottery draw in the case of a lottery operated as a joint lottery.

Remote data file: jedna_hra.csv

Remote item: IDJednaHra

Item 3

Operator

Machine file name:

IDProvozovatel

Data type:

Reference link with a maximum length of 20 characters

Item description:

Identifier of the operator which provides automated data output.

Remote data file: provozovatel.csv

Remote item: IDProvozovatel

Item 4

Identification of joint gambling capital

Machine file name:

HerniJistina

Data type:

Text with a maximum length of 500 characters

Item description:

The identification of the joint gambling capital by the name or in another manner enabling to identify that particular joint gambling capital.

Item 5

The total amount of deposits received from the shared gambling capital

Machine file name:

PrijataVysePuvodni

Data type:

Decimal number

Item description:

The total amount of the deposits received from joint gambling capital for the draw included in the date file jedna_hra.csv linked through reference link included in the item IDJednaHra

If the total amount of deposits from joint gambling capital was not received, a blank entry (NULL) shall be stated.

Item 6

Date and time of total deposits received from the shared gambling capital

Machine file name:

PrijetiCas

Data type:

Date and time

Item description:

The date and time when the total amount of deposits received from joint gambling capital shall be stated.

If the total amount of deposits from joint gambling capital was not received, a blank entry (NULL) shall be stated.

Item 7

The currency of received total deposit from the joint gambling capital

Machine file name:

MenaKodPrijeti

Data type:

Text with a length of 3 characters

Item description:

The code of the currency in which a total deposit from the joint gambling capital was received shall be stated.

If a total deposit from the joint gambling capital was not received, a blank entry (NULL) shall be stated.

Item 8

The total amount of winnings provided into the joint gambling capital

Machine file name:

PoskytnutaVysePuvodni

Data type:

Decimal number

Item description:

The total amount of winnings provided for joint gambling capital for a draw of the shared lottery stated in entry of the data file jedna_hra.csv linked through reference link included in the item IDJednaHra.

In case that the total amount of winnings was not provided for the shared gambling capital, a blank entry (NULL) shall be stated.

Item 9

Date and time of provided deposits total amount into shared gambling capital

Machine file name:

PoskytnutiCas

Data type:

Date and time

Item description:

The date and time when the total amount of deposits was provided for joint gambling capital shall be stated.

In case that the total amount of winnings was not provided for joint gambling capital, a blank entry (NULL) shall be stated.

Item 10

Currency of total winnings received into the provided shared gambling capital

Machine file name:

MenaKodPoskytnuti

Data type:

Text with a length of 3 characters

Item description:

The code of the currency in which the total amount of winnings provided into the joint gambling capital was provided shall be stated.

In case that the total amount of winnings was not provided for shared gambling capital, a blank entry (NULL) shall be stated.

Data file XVIII

The additional data about the next gambling and financial data by odds betting

Data file name:

hra_toky_kursova.csv

Data file content:

The data file shall contain additional gambling and financial data on odds betting.

The entry shall be provided for the first time in the automated data output for the period in which the bet or part thereof was accepted. If any value entered under the item changes due to the fact that the item was not known at the moment the entry was provided for the first time, the entire entry shall be provided again with the current values in the automated data output for remote access for the period when the value of that entry under the item changed.

Conditions for including the data file in the data file:

Data file shall be included only when providing gambling and financial data on odds betting.

Entry items:

Item 1

Entry identifier on bet into the odds betting

Machine file name:

IDHraTokyKursova

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator

Item 2

Bet, or part thereof

Machine file name:

IDHraToky

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the bet or part thereof containing the basic gambling and financial data on the bet or part thereof.

Remote data file: hra_toky.csv

Remote item: IDHraToky

Item 3

Ticket of odds bet

Machine file name:

IDTiket

Data type:

Reference link with a maximum length of 50 characters

Item description:

Unique identifier of the odds betting ticket, in which the bet or part of the bet stated in the entry of data file hra_toky.csv linked through reference link included in the item IDHraToky.

Remote data file: tiket.csv

Remote item: IDTiket

Item 4

The amount of odds

Machine file name:

SpolecnyKursVyse

Data type:

Decimal number with up to 3 decimal places

Item description:

The odds at which the bet or thereof was accepted or rejected shall be stated. If the claim to a winning is conditional on correctly guessing the result of another betting opportunity, the odds decisive for these betting opportunities at the time of accepting the bet or part of the bet shall be stated.

Item 5

The agreement acceptance on cash-out

Machine file name:

CashOut

Data type:

Binary value

Item description:

Information as to whether the participant accepted a cash-out agreement.

It shall be stated:

0 –agreement cannot be accepted.

1 –agreement was accepted.

If an acceptance can be given but was not given yet, a blank entry (NULL) shall be stated.

Item 6

The amount of agreed payment ratio

Machine file name:

CashOutKursVyse

Data type:

Decimal number with up to 3 decimal places

Item description:

If the value '1' is stated the item CashOut , the agreed cash-out ratio shall be stated.

If the value '0' is stated the item CashOut , or is blank (NULL), a blank entry (NULL) shall be stated.

Item 7

Date and time of agreement acceptance on cash-out

Machine file name:

CashOutCas

Data type:

Date and time

Item description:

If the value '1' is stated the item CashOut , the time of agreement shall be stated.

If the value '0' is stated the item CashOut , or is blank (NULL), a blank entry (NULL) shall be stated.

Item 8

Odds advantage

Machine file name:

KursoveZvyhodneni

Data type:

Decimal number

Item description:

The coefficient of the odds advantage granted to the participant in the context of placing odds betting shall be stated.

If no odds advantage was granted to the participant, a blank entry (NULL) shall be stated.

Item 9

The change of odds

Machine file name:

KursZmena

Data type:

Decimal number with up to 3 decimal places

Item description:

The changed odds at which the bet was evaluated based on the game plan, if different from the odds indicated under the item SpolecnyKursVyse, shall be stated.

Odds may be changed only on the basis of circumstances specified in the game plan.

If the bet was evaluated at the odds specified under the item SpolecnyKursVyse, a blank entry (NULL) shall be stated.

If the bet is yet to be evaluated, a blank entry (NULL) shall be stated.

Item 10

Condition to claim the winning

Machine file name:

AKO

Data type:

Binary value

Item description:

Information as to whether the claim to the winning is conditional on correctly guessing the result of another betting opportunity.

It shall be stated:

0 –claim to the winning is not conditional.

1 –claim to the winning is conditional.

Data file XIX

Data on betting opportunity on which the bet was placed

Data file name:

kursova_toto_rozpad.csv

Data file content:

The data file shall contain the details of the betting opportunity on which bet in a odds betting or in a totalisator game was placed.

The data entry shall be provided for the first time in the automated data output for the period in which the bet or part of the bet was accepted. If the claim to the winning is conditional on correctly guessing another betting opportunity, exactly one entry shall be provided for every betting opportunity to which the odds betting relates.

Conditions for including the data file in the data file:

Data file shall be included only when providing gambling and financial data on

1. odds betting or
2. totalizator game.

Entry items:

Item 1

Entry identifier on betting opportunity

Machine file name:

IDKursovaTotoRozpad

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: String specified by the operator.

Item 2

Bet, or part thereof

Machine file name:

IDHraToky

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the bet or part thereof containing the basic gambling and financial data on the bet or part thereof.

Remote data file: hra_toky.csv

Remote item: IDHraToky

Item 3

Betting opportunity

Machine file name:

IDPrilezitost

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the betting opportunity, on which the bet, or part thereof, was placed.

Remote data file: prilezitost.csv

Remote item: IDPrilezitost

Item 4

Odds amount

Machine file name:

KursVyse

Data type:

Decimal number up to 3 decimal places

Item description:

If the value 'K' is stated in the item HraDruh in the data file hra_toky.csv linked through reference link included in the item IDHraToky the odds amount which was stated for betting opportunity stated in the data file data file prilezitost.csv linked through reference link included in the item IDPrilezitost at the moment of placing of the bet, shall be stated.

If the value 'R' is stated in the item HraDruh in the data file hra_toky.csv linked through reference link included in the item IDHraToky, a blank entry (NULL) shall be stated.

Data file XX

The data on correction of amount of cash funds within each type of supply

Data file name:

hra_toky_oprava.csv

Data file content:

The data file shall contain information on the corrections of the amount of cash funds within each type of supply, which occurred during the period covered by the automated data output.

One entry shall be provided for every correction.

Conditions for including the data file in the data file:

Data file shall always be included.

Entry items:

Item 1

Entry identifier on correction

Machine file name:

IDHraTokyOprava

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: String specified by the operator.

Item 2

Bet, or part thereof

Machine file name:

IDHraToky

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the bet, or part thereof, that are being corrected.

Remote data file: hra_toky.csv

Remote item: IDHraToky

Item 3

Type of supply

Machine file name:

TypTokyOprava

Data type:

Text with a length of 1 character

Item description:

Item description:

Single-letter identifier referring to the type of supply to which the correction relates.

It shall be stated:

- A** – bet, or part thereof
- B** – winning paid out
- C** – accompanying payment, or proportionate part thereof.
- D** – returned accompanying payment.
- E** – foreign deposit.
- F** – foreign winning.
- G** – returned bet or part thereof.
- J** – rejected bet or part thereof.

Item 4

The amount of supply correction

Machine file name:

TokyOpravaVyse

Data type:

Decimal place

Item description:

Amount of an additionally received part of the bet

If the value 'A' is stated in item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and concerns an additionally received part of the bet, the amount of the part of the bet additionally received by the operator from the participant on the basis of a correction shall be stated. The additionally received amount shall be stated as a positive number

Amount of a reduction of a bet or part thereof

If the value 'A' is stated in item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the reduction of the amount of the bet or part of the bet, the amount of reduction of the bet or part of the bet on the basis of a correction shall be stated. The amount of the reduction shall be stated as a negative number.

Amount of an additionally paid-out part of the winning

If the value 'B' is stated in item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the pay-out of a part of a winning to which the participant became entitled on the basis of the bet, the amount of the part of the winning additionally paid out to the gambling participant by the operator on the basis of a correction shall be stated. The additionally paid-out amount shall be stated as a positive number.

Amount of a reduction of a paid-out winning

If the value 'B' is stated in item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the reduction of a paid-out winning, entitlement to which was granted to the gambling participant on the basis of the bet, the amount of reduction of the paid-out winning on the basis of a correction shall be stated. The amount of the reduction shall be stated as a negative number.

Amount of an additionally received part of an accompanying supply or a proportionate part thereof

If the value 'C' is stated in item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns a part of the accompanying supply received together with the bet, the amount of the part of the accompanying supply, or a proportionate part thereof, additionally received by the operator on the basis of a correction shall be stated. The additionally received amount shall be stated as a positive number.

Amount of a reduction of an accompanying supply or a proportionate part thereof

If the value 'C' is stated in item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the reduction of an accompanying supply, or a proportionate part thereof, received together with the bet, the amount of reduction of the accompanying supply, or the proportionate part thereof, on the basis of a correction shall be stated. The amount of the reduction shall be stated as a negative number.

Amount of a returned accompanying supply or a proportionate part thereof

If the value 'D' is stated in item TokyOpravaVyse in the data file hra_toky.csv linked by reference through included in the item IDHraToky and it concerns the return of an accompanying supply (originally received together with the bet) or a proportionate part thereof, the amount of accompanying supply or the proportionate part thereof returned by the operator in accordance with the Gambling Act or on the basis of the approved game plan shall be stated. The returned amount shall be stated as a positive number.

Amount of a reduction of a returned accompanying supply or a proportionate part thereof

If the value 'D' is stated in item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the reduction of a returned accompanying supply (originally received together with the bet or a proportionate part thereof), the amount of reduction of the returned accompanying supply or the proportionate part thereof on the basis of a correction shall be stated. The amount of the reduction shall be stated as a negative number.

Amount of an additionally received part of a foreign deposit

If the value 'E' is stated in the item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns an additionally received part of the foreign deposit, the amount of the part of the foreign deposit additionally received by the operator on the basis of a correction shall be stated. The additionally received amount shall be stated as a positive number.

Amount of a reduction of a foreign deposit

If the value 'E' is stated in the item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the reduction of the foreign deposit, the amount of reduction of the foreign deposit on the basis of a correction or for another reason shall be stated, if these reductions are claimed by the operator in the gambling tax return. The amount of the reduction shall be stated as a negative number.

Amount of an additionally paid-out part of a foreign winning

If the value 'F' is stated in the item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the pay-out of a part of a foreign winning, to which a foreign participant became entitled on the basis of the deposit, the amount of the part of the foreign winning additionally paid out by the operator on the basis of a correction shall be stated. The additionally paid-out amount shall be stated as a positive number.

Amount of a reduction of a paid-out foreign winning

If the value 'F' is stated in the item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the reduction of a foreign winning, entitlement to which was granted to the foreign participant on the basis of the deposit, the amount of reduction of the foreign winning on the basis of a correction shall be stated. The amount of the reduction shall be stated as a negative number.

Amount of a bet or part of a bet returned by the operator

If the value 'G' is stated in the item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the return of the bet or part of the bet, the amount of bet or part thereof returned by the operator in accordance with the Gambling Act or on the basis of the approved game plan shall be stated. The returned amount shall be stated as a positive number.

Amount of reduction of a bet or part of a bet returned by the operator

If the value 'G' is stated in the item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the reduction of the bet or part of the bet, the amount of reduction of the bet or part of the bet returned by the operator on the basis of a correction shall be stated. The amount of the reduction shall be stated as a negative number.

Amount of a rejected bet

If the value "e" is stated in the item HraKategorie in the data file hra_toky.csv linked through reference link included in the item IDHraToky and value "J" is stated in the item TypTokyOprava the amount of the rejected bet identified shall be stated. The amount of the rejected bet shall be stated as a positive number.

Item 5

Date and time of supply correction

Machine file name:

TokyOpravaCas

Data type:

Date and time

Item description:

Date and time of an additionally received part of the bet

If the value 'A' is stated in item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and concerns an additionally received part of the bet, the date and time of the additional receipt of a part of a bet received by the operator on the basis of a correction shall be stated.

Date and time of a reduction of a bet or part thereof

If the value 'A' is stated in item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the reduction of the amount of the bet or part of the bet, the date and time of reduction of the whole or part of the bet on the basis of a correction shall be stated.

Date and time of an additionally paid-out part of the winning

If the value 'B' is stated in item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the pay-out of a part of a winning to which the participant became entitled on the basis of the bet, the date and time of the additional pay-out of a part of the winning shall be stated.

Date and time of a reduction of a paid-out winning

If the value 'B' is stated in item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the reduction of a paid-out winning, entitlement to which was granted to the gambling participant on the basis of the bet, the date and time of reduction of the paid-out winning on the basis of a correction shall be stated.

Date and time of an additionally received part of an accompanying supply or a proportionate part thereof

If the value 'C' is stated in item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns a part of the accompanying supply received together with the bet, the date and time when that part of the accompanying supply, or a proportionate part thereof, was additionally received by the operator on the basis of a correction shall be stated.

Date and time of a reduction of an accompanying supply or a proportionate part thereof

If the value 'C' is stated in item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the reduction of an accompanying supply, or a proportionate part thereof, received together with the bet the date and time of every reduction of the accompanying supply, or the proportionate part thereof, on the basis of a correction shall be stated.

Date and time of a returned accompanying supply or a proportionate part thereof

If the value 'D' is stated in item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the return of an accompanying supply (originally received together with the bet) or a proportionate part thereof, the date and time of every occasion when the accompanying payment or the proportionate part thereof was returned shall be stated.

Date and time of a reduction of a returned accompanying supply or a proportionate part thereof

If the value 'D' is stated in item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the reduction of a returned accompanying supply (originally received together with the bet or a proportionate part thereof), the date and time of reduction of the returned accompanying payment or the proportionate part thereof on the basis of a correction shall be stated.

Date and time of an additionally received part of a foreign deposit

If the value 'E' is stated in the item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns an additionally received part of the foreign deposit, the date and time when the foreign deposit was additionally received by the operator on the basis of a correction shall be stated.

Date and time of a reduction of a foreign deposit

If the value 'E' is stated in the item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the reduction of the foreign deposit, the date and time of every reduction of the foreign deposit on the basis of a correction shall be stated.

Date and time of an additionally paid-out part of a foreign winning

If the value 'F' is stated in the item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the pay-out of a part of a foreign winning, to which a foreign participant became entitled on the basis of the deposit, the date and time of the additional pay-out of the foreign winning, which was paid out by the operator on the basis of a correction, shall be stated.

Date and time of a reduction of a paid-out foreign winning

If the value 'F' is stated in the item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the reduction of a foreign winning, entitlement to which was granted to the foreign participant on the basis of

the deposit, the date and time of every reduction of the paid-out foreign winning shall be stated.

Date and time of a bet or part of a bet returned by the operator

If the value 'G' is stated in the item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the return of the bet or part of the bet, the date and time of every occasion when the whole or part of the bet was returned by the operator shall be stated.

Date and time of reduction of a bet or part of a bet returned by the operator

If the value 'G' is stated in the item TokyOpravaVyse in the data file hra_toky.csv linked through reference link included in the item IDHraToky and it concerns the the reduction of the bet or part of the bet, the date and time of every occasion when the whole or part of the bet was reduced by the operator on the basis of a correction shall be stated.

Date and time of a rejected bet

If the value "e" is stated in the item HraKategorie in the data file hra_toky.csv linked through reference link included in the item IDHraToky and value "J" is stated in the item TypTokyOprava the amount of the rejected bet identified shall be stated, the date and time when the bet was rejected shall be stated.

Item 6

Currency code

Machine file name:

MenaKod

Data type:

Text with a length of 3 characters

Item description:

The currency code in which the bet, or part thereof or foreign deposit stated in the entry of data file hra_toky.csv linked via reference link listed in item IDHraToky was received or rejected, shall be stated.

Data file XXI

The data on correction of supply by the joint lottery

Data file name:

sdileni_oprava.csv

Data file content:

The data file shall contain information on corrections of payments for a joint lottery, which occurred during the period covered by the automated data output.

Conditions for including the data file in the data file:

Data file shall be included only when providing gambling and financial data on lottery.

Entry items:

Item 1

Identifier of entry correction on transaction regarding the joint gambling capital

Machine file name:

IDSdileniOprava

Data type:

Text with a length of 3 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: String specified by the operator.

Item 2

Transaction entry regarding shared gambling capital

Machine file name:

IDSdileni

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of transaction entry regarding shared gambling capital of which the correction relates.

Remote data file: sdileni.csv

Remote item: IDSdileni

Item 3

Type of supply

Machine file name:

TypSdileniOprava

Data type:

Text with a length of 2 characters

Item description:

Two-letter identifier referring to the type of the supply that was corrected.

It shall be stated:

BX – the total amount of winnings provided for joint gambling capital

CX – the total amount of deposits received from joint gambling capital

Item 4

Amount of supply correction

Machine file name:

SdileniOpravaVyse

Data type:

Decimal number

Item description:

Amount of an additionally received part of the total amount of deposits received from joint gambling capital

If the value 'CX' is stated in the item TypSdileniOprava in this data file and it concerns the additional receipt of a part of the total amount of deposits received from joint gambling capital in relation to the transaction identified under the item IDSdileni, the amount of the part of the total amount of deposits from joint gambling capital additionally received by the operator on the basis of a correction shall be provided. The additionally received amount shall be stated as a positive number.

Amount of an additionally returned the total amount of deposits received from gambling capital

If the value 'CX' is stated in the item TypSdileniOprava in this data file and it t concerns the additional return of the total amount of deposits received from joint gambling capital related to the transaction identified under the item IDSdileni, the amount every additionally returned total amount of deposits received from joint gambling capital on the basis of a correction shall be provided. The additionally returned amount shall be stated as a negative number.

Amount of an additionally provided part of the total amount of winnings provided for joint gambling capital

If the value 'BX' is stated in the item TypSdileniOprava in this data file and it concerns the additional provision of a part of the total amount of winnings provided for joint gambling capital in relation to the transaction identified under the item IDSdileni, the amount of the part of the total amount of winnings additionally provided by the operator for joint gambling capital on the basis of a correction shall be provided. The additionally provided amount shall be stated as a positive number.

Amount of an additionally received the total amount of winnings provided for joint gambling capital

If the 'BX' is stated in the item TypSdileniOprava in this data file and it concerns the additional receipt of the total amount of winnings provided for joint gambling capital in relation to the transaction identified under the item IDSdileni, the amount of every total amount of winnings provided for joint gambling capital additionally received on the basis of a correction shall be provided. The additionally received amount shall be stated as a negative number.

Item 5

Date and time of supply correction

Machine file name:

SdileniOpravaCas

Data type:

Date and time

Item description:

Date and time of the additional receipt of a part of the total amount of deposits

If the value 'CX' is stated in the item TypSdileniOprava in this data file and it concerns the additional receipt of a part of the total amount of deposits received from shared gambling capital in relation to the transaction identified under the item IDSdileni, the date and time when the part of the total amount of deposits from joint gambling capital was additionally received by the operator on the basis of a correction shall be stated.

Date and time of the return of the total amount of deposits received from joint gambling capital

If the value 'CX' is stated in the item TypSdileniOprava in this data file and it concerns the additional return of the total amount of deposits received from joint gambling capital related to the transaction identified under the item IDSdileni, the date and time when total amount of deposits received from joint gambling capital was returned on the basis of correction shall be stated.

Date and time of the additional provision of a part of the total amount of winnings

If the value 'BX' is stated in the item TypSdileniOprava in this data file and it concerns the additional provision of a part of the total amount of winnings provided for joint gambling capital in relation to the transaction identified under the item IDSdileni, the date and time when the part of the total amount of winnings for joint gambling capital was additionally provided by the operator on the basis of a correction shall be stated.

Date and time of the additional receipt of the total amount of winnings provided for joint gambling capital

If the 'BX' is stated in the item TypSdileniOprava in this data file and it concerns the additional receipt of the total amount of winnings provided for joint gambling capital in relation to the transaction identified under the item IDSdileni the date and time of every occasion when the total amount of winnings provided for joint gambling capital was additionally received on the basis of a correction shall be stated.

Item 6

Currency code

Machine file name:

MenaKod

Data type:

Text with a length of 3 characters

Item description:

The code of the currency used for correction of the transaction relating to joint gambling capital shall be stated.

Data file XXII

The data on other supply

Data file name:

ostatni_plneni.csv

Data file content:

The data file shall contain information on of other supply required by the operator in addition to a bet that allows the gambling participant to participate in gambling and which is not tied to a particular game (hereinafter referred to as the 'other supply'). The entry shall be provided for the first time in the automated data output for the period in which the other supply was received in the original amount.

Conditions for including the data file in the data file:

Data file shall always be included.

Entry items:

Item 1

Identifier of other supply

Machine file name:

IDostatniPlneni

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: String specified by the operator.

Item 2

Operator

Machine file name:

IDProvozovatel

Data type:

Reference link with a maximum length of 20 characters

Item description:

Identifier of the operator for which provides automated data output.

Remote data file: provozovatel.csv

Remote item: IDProvozovatel

Item 3

User account

Machine file name:

IDUzivKonto

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the user account, from which the other supply was provided.

Remote data file: konto.csv

Remote item: IDUzivKonto

If no user account has been set up for the participant, the blank entry (NULL) shall be stated.

Item 4

Type of gambling

Machine file name:

HraDruh

Data type:

Text with a maximum length of 1 character

Item description:

The single-letter identification of the type of gambling for which the other was provided.

It shall be stated:

L – lottery.

K – odds betting.

R – totalisator game.

B – bingo.

T – technical game.

Z – live game.

Item 5

The amount of other supply, or its proportion part

Machine file name:

OstatniPlneniVysePuvodni

Data type:

Decimal number

Item description:

The amount other supply or its proportional part was received shall be stated.

Item 6

Date and time of receiving the other supply

Machine file name:

OstatniPlneniCas

Data type:

Date and time

Item description:

Date and time when the other supply or its proportionate part was received shall be stated.

Item 7

Currency code

Machine file name:

MenaKod

Data type:

Text with a maximum length of 3 characters

Item description:

The code of the currency in which the other supply or part thereof was received or returned shall be stated.

Item 8

Point of sale, betting office or gambling premises

Machine file name:

IDMisto

Data type:

Reference link with a maximum length of 50 characters

Item description:

Identifier of the point of sale, betting office or gambling premises where the other supply was received.

Remote data file: misto.csv

Remote item: IDMisto

If the other supply was received in connection with participation in an online game, the blank entry (NULL) shall be stated.

Data file XXIII

The data on other supply correction

Data file name:

ostatni_plneni_oprava.csv

Data file content:

Data file shall include data on correction of the amount of cash funds on other supply that occurred during the period for which the automated data output for remote access is provided.

Just one entry shall be provided for each correction.

Conditions for including the data file in the data file:

Data file shall always be included.

Entry items:

Item 1

Identification or other supply correction

Machine file name:

IDostatniPlneniOprava

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: String specified by the operator.

Item 2

Other supply

Machine file name:

IDOstatniPlneni

Data type:

Reference link with a maximum length of 50 characters

Item description:

The identifier of other supply, for which correction is provided.

Remote data file: ostatni_plneni.csv

Remote item: IDOstatniPlneni

Item 3

Type of supply

Machine file name:

TypOstatniPlneniOprava

Data type:

Text with a length of 1 character

Item description:

Type of other supply for which is correction provided.

It shall be stated:

H –other supply or a proportionate part thereof.

I – returned other supply or a proportionate part thereof.

Item 4

The amount of correction supply

Machine file name:

OstatniPlneniOpravaVyse

Data type:

Decimal number

Item description:

Amount of an additionally received part of the other supply or a proportionate part thereof

If the "H" entry is listed in the item TypOstatniPlneniOprava, and it represents additional receipt of part of the received other supply or its proportional part included in the record in the data file ostatni_plneni.csv, linked through the reference link included in IDOstatniPlneni,

the amount of the other supply, or its proportion, which was subsequently accepted by the operator as a result of the correction shall be stated. The amount of the additional admission shall be stated as a positive number.

Amount of a reduction of the other supply or a proportionate part thereof

If the "H" entry is listed in the item TypOstatniPlneniOprava, and it represents reduction of part of the received other supply or its proportional part included in the record in the data_file ostatni_plneni.csv, linked through the reference link included in IDOstatniPlneni, the amount of the other supply, or its proportion, which was subsequently reduced by the operator as a result of the correction shall be stated. The amount of the additional admission shall be stated as a negative number.

Amount of returned other supply or a proportionate part thereof

If the "I" entry is listed in the item TypOstatniPlneniOprava, and it represents return of part of the received other supply or its proportional part included in the record in the data_file ostatni_plneni.csv, linked through the reference link included in the item IDOstatniPlneni, the amount of the other supply, or its proportion, which was subsequently returned by the operator or on the basis of the legal reason differing from a correction shall be stated. The amount of the additional admission shall be stated as a positive number

Amount of a reduction of a returned other supply or proportionate part thereof

If the "I" entry is listed in the TypOstatniPlneniOprava, and it represents reduction of return of part of the received other supply or its proportional part included in the record in the data_file ostatni_plneni.csv, linked through the reference link included in IDOstatniPlneni, the amount of reduction of returned other supply, or its proportion, based on correction, shall be stated. The amount of the additional admission shall be stated as a negative number.

Item 5

Date and time of correction

Machine file name:

OstatniPlneniOpravaCas

Data type:

Date and time

Item description:

Date and time of the additional receipt of the other supply or a part of thereof

If the "H" entry is listed in the item TypOstatniPlneniOprava, and it represents additional receipt of part of the received other supply or its proportional part included in the record in the data_file ostatni_plneni.csv, linked through the reference link included in the item IDOstatniPlneni, the date and time of acceptance received other supply or its proportional part received by the operator on the basis of correction shall be stated.

Date and time of the reduction of the other supply or part thereof

If the "H" entry is listed in the item TypOstatniPlneniOprava, and it represents reduction of part of the received other supply or its proportional part included in the record in the data_file ostatni_plneni.csv, linked through the reference link included in IDOstatniPlneni, the date and time of reduction of other supply or part thereof shall be stated.

Date and time of the return of other supply or a proportionate part thereof

If the "I" entry is listed in the item TypOstatniPlneniOprava, and it represents return of part of the received other supply or its proportional part included in the record in the data_file ostatni_plneni.csv, linked through the reference link included in the item IDOstatniPlneni, the date and time of the return of other supply or a proportionate part shall be stated.

Date and time of the reduction of a returned other supply or a proportionate part thereof

If the "I" entry is listed in the TypOstatniPlneniOprava, and it represents reduction of return of part of the received other supply or its proportional part included in the record in the data_file ostatni_plneni.csv, linked through the reference link included in IDOstatniPlneni, the date and time of reduction of returned other supply, or its proportion, based on correction shall be stated.

Item 6

Currency code

Machine file name:

MenaKod

Data type:

Text with a length of 3 characters

Item description:

The code of the currency in which the other supply or part thereof was received or returned shall be stated.

Data file XXIV

The data on user account login

Data file name:

prihlaseni.csv

Data file content:

The data file shall include the gambling participant login information to a user account that occurred during the period for which the automated remote access output is provided. In the event that a value of a record item is changed because the item was not known at the time the record was first provided, the entire record with the current values is returned to the automated remote access output for the period when the record item value was changed.

Conditions for including the data file in the data file:

Data file shall always be included.

Entry items:

Item 1

Identifier of user account login

Machine file name:

IDPrihlaseni

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: String specified by the operator.

Item 2

User account

Machine file name:

IDUzivKonto

Data type:

Reference link with a length of 50 characters

Item description:

The identifier of user account to which the gambling participant was logged in.

Remote data file: konto.csv

Remote item: IDUzivKonto

Item 3

Date and time of user account login

Machine file name:

PrihlaseniCas

Data type:

Date and time

Item description:

The date and time when the gambling participant logged in to the user account specified in the entry in the konto.csv data file linked via the reference link specified in item IDUzivKonto shall be stated.

Item 4

Date and time of user account logout

Machine file name:

OdhlaseNiCas

Data type:

Date and time

Item description:

The date and time when the gambling participant was logged out from the user account specified in the entry in the konto.csv data file linked via the reference link specified in IDUzivKonto.

If the gambling participant has not been unsubscribed at the end of the period for which the remote access automated data output is provided, a blank entry (NULL) shall be stated.

Item 5

Game point of the terminal device of the technical game

Machine file name:

IDHerniPozice

Data type:

Reference link with a maximum length of 50 characters

Item description:

The game point identifier of a terminal device through which a gambling participant has logged in to the user account specified in the entry in the konto.csv data file linked through the reference link specified in IDUzivKonto if it concerns technical game and participation is through technical device placed in game premises.

Remote data file: herni_pozice.csv

Remote item: IDHerniPozice

In other cases, a blank entry (NULL) shall be stated.

Data file XXV

The data on self-restricting measures of gambling participant or on setting up the automated receiving bet by odds betting

Data file name:

sebeomezeni.csv

Data file content:

The data file shall contain data on the self-restricting measures set by the gambling participants and on modifications of its setting.

In the case where the setting of a given type of self-restricting gambling action concerns more than one type of gambling, a single entry for that type of self-restricting gambling participant's action in this data file shall be given.

In the automated remote access output provided for the period during which a user account has been set up for a gambling user, records for all types of self-restricting measures, regardless of whether the gambling participant has set these self-restricting measures in relation to this user account, or whether they have declined their settings.

In the case of an exchange bet where the operator permits the possibility of setting automatic betting with different betting opportunities parameters, the data file furthermore contains data about receiving automatic betting with different betting opportunities parameters or not using their auto-acceptance option for the period for which it is automated remote access output provided.

When delivering the automated data output for the first time, the data file shall contain data entries on all self-restricting measures currently set by all gambling participants and in the case of an odds betting where the operator admits the possibility of automatically accepting bets with different betting opportunities parameters, the data file contains a record of the individual acceptance of automatic betting with different betting opportunities parameters or the non-use of the automatic receiving option.

Conditions for including the data file in the data file:

Data file shall always be included.

Entry items:

Item 1

Identifier of setting up the self-restricting measure

Machine file name:

IDNastaveniSO

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

If the value of the self-restricting measure is set at the same time for more than one type of gambling, the self-restricting measure for all this automated remote access output is always the same identifier of the self-restricting measure.

Item 2

User account

Machine file name:

IDUzivKonto

Data type:

Reference link with a length of 50 characters

Item description:

The user account identifier to which the type of self-restricting measure refers, changing its settings, or automatically accepting bets with different betting opportunities parameters.

Remote data file: konto.csv

Remote item: IDUzivKonto

Item 3

Type of self-restricting measure or automated receiving the bet

Machine file name:

TypSO

Data type:

Text with a maximum length of 2 characters

Item description:

The type of self-restricting measure that was a participant of the gambling listed in the record in the konto.csv data file established via the reference link specified in the IDUzivKonto item is set or rejected, or information on the setting of automatic betting with different parameters of betting opportunity.

It shall be stated:

a - maximum amount of bets per day

b - maximum bets per calendar month

c - maximum amount of net loss in 1 day

d - maximum net loss per calendar month

e - maximum number of user account logins per calendar month

f - maximum daily login on user account until automatic logout

g - the maximum time for which a gambling participant shall not be allowed to participate in gambling with this operator after logging out of the user account

ap - setting of automatic acceptance of a bet with different betting parameters than the ones originally selected by the bettor, if these parameters changed during the betting period as regards the odds betting and the operator allowed this setting

Item 4

The value of self-restricting measure - amount

Machine file name:

HodnotaVyse

Data type:

Decimal number

Item description:

If the value of "a", "b", "c" or "d" is entered in the TypSO entry, the value of the set self-restricting measure shall be stated.

If a gambling participant has not set or declined the setting of the self-restricting measure specified in the TypSO item, or if the setting has been individually rejected, the blank entry (NULL) shall be stated.

In the case of other types of self-restricting measures and automatic betting with different betting parameters, a blank entry (NULL) shall be stated.

Item 5

The value of self-restricting measure - number

Machine file name:

HodnotaPocet

Data type:

Integer

Item description:

If the value of "e" is entered in the TypSO entry, the number of login into the user account shall be stated.

If a gambling participant has not set or declined the setting of the self-restricting measure specified in the TypSO item, or if the setting has been individually rejected, the blank entry (NULL) shall be stated.

In the case of other types of self-restricting measures and automatic betting with different betting parameters, a blank entry (NULL) shall be stated.

Item 6

The value of self-restricting measure - period

Machine file name:

HodnotaCas

Data type:

Integer

Item description:

If the value of "f", or "g" is entered in the TypSO entry, the value of self-restricting measure in whole minutes shall be stated.

If a gambling participant has not set or declined the setting of the self-restricting measure specified in the TypSO item, or if the setting has been individually rejected, the blank entry (NULL) shall be stated.

In the case of other types of self-restricting measures and automatic betting with different betting parameters, a blank entry (NULL) shall be stated.

Item 7

Date and time of setting up the value

Machine file name:

SONastaveniCas

Data type:

Date and time

Item description:

The date and time at which the value of the self-restricting measure or the automatic acceptance of bets with different betting parameters shall be stated.

If the setting of the self-restricting measure has been rejected, the date and time of the rejection of the setting shall be indicated.

In the case of automatic acceptance of bets with different betting parameters, the date and time at which automatic acceptance of bets setting was made or the rejection shall be stated.

If the gambling participant has not yet set or refused the setting of the self-restricting measure in the TypSO, the date and time of setting up the user account shall be stated.

Item 8

Date and time of value efficiency

Machine file name:

SOUcinnostiCas

Data type:

Date and time

Item description:

The date and time at which the value of the self-restricting measure or the automatic acceptance of bets with different betting parameters occurred or took effect shall be stated.

If the setting of a self-restricting measure or automatic acceptance of bets with different betting parameters has been rejected, the date and time at which rejecting the setting occurred or took effect shall be stated.

If the gambling participant has not yet set or refused the setting of the self-restricting measure in the TypSO, the date and time of setting up the user account shall be stated.

Item 9

The refusal of setting up the value

Machine file name:

S00dm1tnuti

Data type:

Binary value

Item description:

Information on whether a participant of gambling has set the value of a self-restricting measure or has set automatic acceptance of bets with different betting parameters, or has refused to set the value of the self-restricting measure, or has not set the possibility of automatic acceptance of bets with different betting opportunities.

It shall be stated:

0 - a participant of gambling has set the value of a self-restricting measure or has set an automatic acceptance of bets with different betting opportunities parameters

1 – a participant of gambling refused to set the value of the self-restricting measure or did not set an automatic acceptance of bets with different betting opportunities parameters

If a participant of gambling has not yet set or declined the setting of a self-restricting measure, a blank entry (NULL) shall be stated.

Item 10

The currency code

Machine file name:

MenaKod

Data type:

A text with a length of 3 characters

Item description:

If the value of "a", "b", "c" or "d" is entered in the TypSO entry, the currency code set in self-restricting measure shall be stated.

In the case of other types of self-restricting measures and automatic acceptance of bets with different betting parameters, a blank entry (NULL) shall be stated.

Data file XXVI

The data on type of game for which the self-limited measure is set up

Data file name:

sebeomezeni_hra_druh.csv

Data file content:

The data file contains information about the type of game to which the self-restricting measure is set.

For each type of self-restricting measure set for the type of game for which the automated remote access output is provided, just one record shall be stated.

When the automated remote access output is provided for the first time, the data file shall contain data records of all the currently set self-restricting measures of all gambling participants.

Conditions for including the data file in the data file:

Data file shall always be included.

Entry items:

Item 1

Entry identifier on type of game for which the self- restricting measure is set up

Machine file name:

IDS0HraDruh

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

Self-restricting measure

Machine file name:

IDNastaveniSO

Data type:

Reference link with a length of 50 characters

Item description:

The identifier of the self-restricting measure setting for the respective entry.

Remote data file: sebeomezeni.csv

Remote item: IDNastaveniSO

Item 3

Type of gambling

Machine file name:

HraDruh

Data type:

Text with a length of 1 character

Item description:

An identification of the type of gambling for which the self-restricting measure specified in the TypSO entry is set in the record in the sebeomezeni.csv data file established via the reference link specified in the IDNastaveniSO.

It shall be stated:

L – lottery

K – odds betting

R – totalizator game

B – bingo

T – technical game

Z – live game

Data file XXVII

The data on transfer of cash funds

Data file name:

ucet.csv

Data file content:

The data file contains data about the transfer of cash funds to the user account or the user account that occurred during the period for which the automated remote access output is provided.

Conditions for including the data file in the data file:

Data file shall always be included.

Entry items:

Item 1

Identifier of transfer of cash funds

Machine file name:

IDTransakce

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

User account

Machine file name:

IDUzivKonto

Data type:

Reference link with a maximum length of 50 characters

Item description:

The identifier of the user account to which or from the cash funds were transferred.

Remote data file: konto.csv

Remote item: IDUzivKonto

Item 3

The amount of transmitted cash funds

Machine file name:

TransakceVyse

Data type:

Decimal number

Item description:

The amount of transfer of cash funds shall be stated. In the case of transferring cash funds to the user account, a positive number shall be stated. In the case of transferring cash funds from the user account, a negative number shall be stated.

Item 4

Date and time of transition of cash funds

Machine file name:

TransakceCas

Data type:

Date and time

Item description:

Date and time when the cash funds were transferred shall be stated.

Item 5

The method of transfer of cash funds

Machine file name:

TransakceZpusob

Data type:

Binary value

Item description:

The method in which the cash funds were transferred to a user account or from a user account.

It shall be stated:

0 - cash payment

1 - cashless payment

Item 6

Specification of method of transmission of cash funds

Machine file name:

TransakceZpusobUpresneni

Data type:

Text with a maximum length of 250 characters

Item description:

The specification of the manner in which cash funds have been transferred to the user account or from the user account shall be specified.

Item 7

Currency code

Machine file name:

MenaKod

Data type:

Text with a length of 3 characters

Item description:

The code of the currency in which the cash funds were transferred shall be stated.

Data file XXVIII
The data on participation in technical game

Data file name:

doBa_ucasti.csv

Data file content:

The data file contains data about the time of participation of a gambling participant in a technical game that was started during the period for which the automated remote access output is provided. In case that a value of an entry item is changed because the item was not known at the time of the first provision of the record, the entire record with the current values shall again be provided in the automated remote access output during the period when the value of the entry item was changed.

Conditions for including the data file in the data file:

Data file shall be included only when providing game and financial data on technical game.

Entry items:

Item 1

Identification of participation period

Machine file name:

IDDobaUcasti

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

User Account

Machine file name:

IDUzivKonto

Data type:

Reference link with a maximum length of 50 characters

Item description:

The identifier of the user account based on which the game participant participates in game.

Remote data file: konto.csv

Remote item: IDUzivKonto

Item 3

Date and time of the beginning to participate

Machine file name:

ZacatekUcastiCas

Data type:

Date and time

Item description:

The date and time of the beginning of the technical game participation.

Item 4

Date and time of the end of participation

Machine file name:

KonecUcastiCas

Data type:

Date and time

Item description:

The date and time of the end of the technical game participation shall be stated.

If the participation of a gambling participant in the technical game is not terminated at the end of the period for which the automated remote access output is provided, a blank entry (NULL) shall be stated.

Data file XXIX

The data on exchange rate

Data file name:

mena_kurs.csv

Data file content:

The data set shall contain data on the currency exchange rate decisive for determining the gambling tax base for the entire taxable period to which data is related in automated remote access output.

For every calendar day of this tax period, the exchange rate of each currency in which the game and financial data relating to that date, excluding the Czech currency, shall be stated. For each calendar day and each currency, a maximum of one entry shall be stated.

Conditions for including the data file in the data file:

The data file shall always be included in the data file containing the automated remote access output for the last period of the last day of submission of the gambling tax return. In other cases, the data file shall not be included.

Entry items:

Item 1

Entry identification on amount of the exchange rate

Machine file name:

IDZaznamMenaKurs

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

Operator

Machine file name:

IDProvozovatel

Data type:

Reference link with a maximum length of 20 characters

Item description:

The identifier of the operator providing automated data output for remote access.

Remote data file: provozovatel.csv

Remote item: IDProvozovatel

Item 3

Type of gambling

Machine file name:

HraDruh

Data type:

Text with length of 1 character

Item description:

Single-letter identification of the type of gambling.

It shall be stated:

L – lottery

K – odds betting

R – totalizator game

B – bingo

T – technical game

Z – live game

Item 4

Exchange rate decisive for determination of taxable base from gambling

Machine file name:

KursVyse

Data type:

Decimal number up to 3 decimal places

Item description:

The amount of the exchange rate of the Czech currency with respect to the currency in which the financial flows and gambling processes took place, which is decisive for the determination of the gambling tax base, shall be stated.

Item 5

Currency code

Machine file name:

MenaKod

Data type:

Text with a length of 3 characters

Item description:

The currency code in which the financial flows and gambling processes took place shall be stated

Item 6

Identification of calendar date

Machine file name:

Datum

Data type:

Date

Item description:

The calendar day for which the exchange rate is determined shall be stated.

Subsection 4

Content of automated data output for daily gambling reports or daily gambling log

The operator shall provide game and financial data in automated data output for daily gambling reporting or daily gambling log in the data file.

An automated data output for daily gambling reporting or daily gambling log shall contain game and financial data only for the operator, the reporting period, the type of game, and the casino listed in the data file name with that output.

In automated data output data for daily gambling reporting or daily gambling log, the interface version metadata states: 1.0

The data file shall contain the following data files:

Data file I

The data on the operator

Data file name:

provovovatel.csv

Data file content:

The data file shall contain just one entry with operator-specifying data that provides automated data output for daily gambling reporting or daily gambling log, regardless of whether this data has already been provided in a data file containing an automated data output for daily gambling reporting or daily gambling log. The data valid on the last day of the calendar month for which daily gambling reporting or daily gambling log shall be provided.

Types of gambling in which the data file is assigned to automated data output:

The data file is always included.

Entry items:

Item 1

Identifier of the operator

Machine file name:

IDProvozovatel

Data type:

Text with a maximum length of 20 characters

Item description:

An operator's identification number providing an automated data output for daily gambling reporting or daily gambling log or, if the identification number has not been allocated to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license shall be stated. Also, leading zeros shall be included if they are included in the operator's identification number or operator's own number.

Item 2

Identifier of the operator

Machine file name:

ProvozovatelNazev

Data type:

Text with a maximum length of 250 characters

Item description:

The name or business of the operator listed in the Commercial Register or other similar register of the State in which the operator has its registered office.

Data file II

Information about the location where the game is operated

Data file name:

misto.csv

Data file content:

The data file shall contain data indicating the casino for which daily gambling reporting or daily gambling log is provided. The data valid on the last day of the calendar month for which daily gambling reporting or daily gambling log is provided.

For each casino there is just one entry.

Conditions for including the data file in the data file:

The data file shall always be included.

Entry items:

Item 1

Identifier of casino

Machine file name:

IDMisto

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

When multiple gambling is operated in a single gambling premises, the same identifier, including automated data output for remote access, is used in all automated data output provided by the operator.

Item 2

Name of casino

Machine file name:

MistoNazev

Data type:

Text with a maximum length of 250 characters

Item description:

The name of casino listed in the license for location of gambling premises shall be stated.

Item 3

Operator

Machine file name:

IDProvozovatel

Data type:

Text with a maximum length of 20 characters

Item description:

The identifier of the operator providing automated data output for daily gambling reports or daily gambling log.

Remote data file: provozovatel.csv

Remote item: IDProvozovatel

Item 4

Casino's Longitude

Machine file name:

GPSX

Data type:

Decimal number with at least 4 and maximum 7 decimal places

Item description:

In the case where the item SidloKodRuian is blank (NULL), the eastbound (X-axis) in the WGS 84 coordinate system shall be specified as the casino address.

If the longitude of a casino is listed in one of the automated data outputs previously provided, the casino's longitude shall be specified even if the item SidloKodRuian in this entry is not blank (NULL).

In other cases, a blank entry (NULL) shall be stated.

Item 5

Casino's Latitude

Machine file name:

GPSY

Data type:

Decimal number with at least 4 and maximum 7 decimal places

Item description:

In the case where the item SidloKodRuian is blank (NULL), the northern (Y-axis) degrees in the WGS 84 coordinate system shall be specified as the casino address. The lowest number of decimal places is 4 and the highest number of decimal places is 7.

If the latitude of the casino is listed in any of the previously provided automated data outputs, the latitude of the casino shall be specified even if the item SidloKodRuian in this entry is not blank (NULL).

In other cases, a blank entry (NULL) shall be stated.

Item 6

Name of the street or other public location

Machine file name:

Ulice

Data type:

Text with a maximum length of 250 characters

Item description:

The name of the street or other public location in which the casino address is located shall be stated.

Item 7

House number or registration number

Machine file name:

CP

Data type:

Integer

Item description:

The house number or registration number of the casino address shall be stated.

If the house number or registration number is not assigned, a blank entry (NULL) shall be stated.

Item 8

Reference number

Machine file name:

CO

Data type:

Text with a maximum length of 10 characters

Item description:

The reference number with the appendix, if applicable, of the casino address shall be stated.

If reference number is not assigned, a blank entry (NULL) shall be stated.

Item 9

Part of municipality

Machine file name:

CastObce

Data type:

Text with a maximum length of 250 characters

Item description:

In the case of a casino located in the territory of a municipality divided into city districts or city quarters, the name of the city district or city quarter where the address of the casino is located shall be stated.

In case the casino is located in the territory of the capital city of Prague, the name of the cadastral area on which the address of the casino is located shall be stated.

In other cases, a blank entry (NULL) shall be stated.

Item 10

Postal code

Machine file name:

PSC

Data type:

Integer

Item description:

Postal code of casino's address shall be stated.

Item 11

Municipality

Machine file name:

Obec

Data type:

Text with a maximum length of 250 characters

Item description:

The name of municipality in which the casino's address is located shall be stated.

Item 12

The district number of the capital city of Prague

Machine file name:

Obvod

Data type:

Integer

Item description:

The district number of the Capital City of Prague in accordance with the Act on territorial division of the state in which the address of the casino is located shall be stated.

If the address of the casino is not located in the capital city of Prague, a blank entry (NULL) shall be stated.

Item 13

Region

Machine file name:

Kraj

Data type:

Text with a length of 3 characters

Item description:

A three-letter identification of the region in which the casino's address is located.

It shall be stated:

PHA - Capital City of Prague

STC - Central Region

JHC - South Bohemian Region

PLK - Pilsen Region

KVK – Carlsbad

ULK - Ústí nad Labem Region

LBK - Liberec Region

HKK - Hradec Kralove Region

PAK - Pardubice Region

VYS - Vysočina Region

JHM - South Moravian Region

OLK - Olomouc Region

MSK - Moravskoslezský kraj

ZLK - Zlin Region

Item 14

Code of address place

Machine file name:

SidloKodRuian

Data type:

Integer

Item description:

The code of the casino's address assigned to that address in the basic register of territorial identification, addresses and real estate shall be stated.

If the casino's address is not assigned to the address code, the blank entry (NULL) shall be stated.

Data file III

The data on live game or bingo

Data file name:

evidence_her.csv

Data file content:

The data file shall contain data on live game or bingo, not operated as an online game, the operation of which has been authorized by a basic license for at least one day in a calendar month for which a daily gambling reporting or daily gambling log is provided.

The data file shall furthermore contain data on the combination of live games in the case where a live game is played on a live game table or more live games are played in the live tournament (further "live game tournament") without closing the live game table. For each such combination of live games, a separate record shall be stated.

Conditions for including the data file in the data file:

The data file shall always be included.

Entry items:

Item 1

Identifier of life game, or bingo

Machine file name:

IDHra

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

In all automated data outcome for daily gambling reporting or daily gambling log, the same identifiers are used for the same live game or bingo.

Item 2

Operator

Machine file name:

IDProvozovatel

Data type:

Reference number with a maximum length of 20 characters

Item description:

The identifier of the operator providing automated data output for daily gambling reporting or daily gambling log.

Remote data file: provozovatel.csv

Remote item: IDProvozovatel

Item 3

Name of live game, or bingo

Machine file name:

HraNazev

Data type:

Text with a maximum length of 250 characters

Item description:

If the "B" entry is listed in the "HraDruh" item, the bingo name shall be in the form specified in the basic license, regardless of the language and the font.

If the "Z" entry is listed in the "HraDruh" item, the name of the live game shall be in the form specified in the basic license, regardless of the language and the font. In the event that the record contains data on the combination of live games, all the names of the live games that generate this combination shall be stated in this way.

In the case where the name of the gambling is not given in the basic license, the type of gambling under the Gambling Act shall be stated.

Item 4

Type of game

Machine file name:

HraDruh

Data type:

Text with a length of 1 characters

Item description:

One-letter identification of the type of game.

It shall be stated:

B –bingo

Z - live game or a combination of live games

Data file IV

The data on casino's cash register premises, live game table, tournament of live game or bingo drawing lots

Data file name:

pokladna_stul_turnaj_bingo.csv

Data file content:

The data file included in the automated data output for daily gambling reporting shall include data about the casino's cash register, live game's table or live casino tournament. In the case of a live game's table, the details of the operating segment per currency received on this table are given.

The data file contained in the automated daily gambling record output shall contain data about the bingo drawing lots operating segment of the casino.

For the purpose of daily gambling reporting and daily gambling log, the operating segment is understood to mean a continuous part of the operating day in which the casino's cash register, live game's table, live game tournament or bingo were provided.

The entry of the operating segment shall be provided in an automated data output for daily gambling reporting or daily gambling log for a period that includes the operating day of which that segment is part.

Conditions for including the data file in the data file:

The data file shall always be included.

Entry items:

Item 1

Identifier of casino's cash register premises, live game table, tournament of live game, or bingo drawing lots

Machine file name:

IDZaznamPSTB

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

Identifier of casino's cash register, live game table, tournament of live game, or bingo drawing lots

Machine file name:

IDPSTB

Data type:

Identifier with a maximum length of 50 characters

Item description:

Casino's cash register identifier

If the "P" entry is listed in the item PokladnaStulTurnajBingo, this casino account identifier that is divided into two parts shall be stated.

First part: identification number of the operator or, if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

The casino's cash register identifier is repeated for all records relating to this casino's cash register.

Second part: string designated by the operator.

The identifier of the live game's table

If the "S" entry is listed in the item PokladnaStulTurnajBingo, this identifier of a live game's table that is divided into two parts shall be stated.

First part: identification number of the operator or, if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: The serial number or other unique identifier of the live game table that is specified in the clearance for the gambling premises.

The live game's table identifier is repeated for all records relating to this table.

Live game tournament identifier

If the "T" entry is listed in the PokladnaStulTurnajBingo, the tournament identifier of the live game is divided into two parts.

First part: identification number of the operator or, if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string designated by the operator.

The live game tournament identifier is repeated for all entries for this tournament.

Bingo drawings lots identifier

If the "B" entry is listed in the item PokladnaStulTurnajBingo, the bingo drawing lot identifier for bingo, which is divided into two parts, shall be stated.

First part: identification number of the operator or, if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: Serial number of the random number generator for bingo drawings, which is stated in the clearance for the placement of the game premises.

The bingo drawing lots identifier shall be repeated for all entries relating to this draw.

Item 3

Type of entry

Machine file name:

PokladnaStulTurnajBingo

Data type:

Text with a length of 1 character

Item description:

Information about whether this entry contains information about the casino's cash register, the live game's table, the live game tournament, or the bingo.

It shall be stated:

P - casino's cash register

S - live game table

T - live game tournament

B - bingo

Item 4

Casino

Machine file name:

IDMisto

Data type:

Reference link with a maximum length of 50 characters

Item description:

The identifier of the casino for which the automated data output for daily gambling reporting or daily gambling log shall be provided.

Remote data file: misto.csv

Remote item: IDMisto

Item 5

Game

Machine file name:

IDHra

Data type:

Reference link with a maximum length of 50 characters

Item description:

The identifier of a live game played on the respective live game table of a live game within a live game tournament, or bingo, for which the data shall be provided.

Remote data file: evidence_her.csv.

Remote item: IDHra

If the "P" entry is listed in the item PokladnaStulTurnajBingo, a blank entry (NULL) shall be stated.

Item 6

Total amount of net gambling result

Machine file name:

CistyHerniVysledek

Data type:

Decimal number

Item description:

If the "S" entry is listed in the term PokladnaStulTurnajBingo, the total value of the valuable cheques that were accepted by the gambling participants in the game and which were not returned at the same time during the operating segment (further "net game result") shall be stated.

If the "P", "T" or "B" entry is listed in the PokladnaStulTurnajBingo item, the blank entry (NULL) shall be stated.

Item 7

Currency code

Machine file name:

MenaKod

Data type:

Text with a length of 3 characters

Item description:

If the "S" entry is listed in the term PokladnaStulTurnajBingo, the currency code of the net game result as stated in item CistyHerniVysledek shall be stated.

If the "P", "T" or "B" entry is listed in the PokladnaStulTurnajBingo item, the blank entry (NULL) shall be stated.

Item 8

Beginning of operating segment

Machine file name:

ProvozOd

Data type:

Date and time

Item description:

If the "P" entry is listed in the PokladnaStulTurnajBingo item, the date and time of the beginning of the casino's cash register operating segment shall be stated.

If the "S" entry is listed in the PokladnaStulTurnajBingo item, the date and time of the beginning of the operating segment of live game table shall be stated.

If the "T" entry is listed in the PokladnaStulTurnajBingo item, the date and time of the beginning of tournament of live game shall be stated. In the event that a live game tournament is held in more than one operating segments, the date and time of the beginning of that tournament shall be stated.

If the "B" entry is listed in the PokladnaStulTurnajBingo item, the date and time of the beginning of the bingo drawing lots of the operating segment shall be stated.

Item 9

End of operating segment

Machine file name:

ProvozDo

Data type:

Date and time

Item description:

If the "P" entry is listed in the PokladnaStulTurnajBingo item, the date and time of the end of the casino's cash register operating segment shall be stated.

If the "S" entry is listed in the PokladnaStulTurnajBingo item, the date and time of the end of the operating segment of live game table shall be stated.

If the "T" entry is listed in the PokladnaStulTurnajBingo item, the date and time of the end of tournament of live game shall be stated. In the event that a live game tournament is held in more than one operating segment, the date and time of the end of that tournament shall be stated.

If the "B" entry is listed in the PokladnaStulTurnajBingo item, the date and time of the end of the bingo drawing lots of the operating segment shall be stated.

Data file V

The data on each type of funds in cash register with respect to a live game

Data file name:

prostredek.csv

Data file content:

The data file shall contain information about individual types of funds for a single casino's cash register, live game table or live game tournament. Funds is understood a cash funds at the cash register for banknotes, coin box, value chips at the casino's cash register or in the cheques donation cash register and valuable cheques at the tip cash register.

For each entry in the data file pokladna_stul_turnaj_bingo.csv relating to the casino's cash register, live game table or live game tournament, the data on the cash funds at the cash register in relation to the live game shall indicate the beginning and ending condition of the cash funds or valuable cheques at the casino's cash register and individual cash register of live game table and live game tournaments. For each type of resource, each cash register and each currency shall be given a single entry.

Conditions for including the data file in the data file:

The data file shall only be included when providing game and financial data about a live game not operated as an online game.

Entry items:

Item 1

Identifier of entry on means in cash register

Machine file name:

IDZaznamProstredek

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

Operating segment of casino's cash register, live game table, or tournament of live game

Machine file name:

IDZaznamPSTB

Data type:

Reference link with a maximum length of 50 characters

Item description:

The identifier of an operating segment of casino's cash register, live game table or tournament of live game to which the cash register relates.

Remote data file: pokladna_stul_turnaj_bingo.csv

Remote item: IDZaznamPSTB

Item 3

Casino's cash register, live game table, or tournament of live game

Machine file name:

IDPSTB

Data type:

Reference link with a maximum length of 50 characters

Item description:

The identifier of casino's cash register, live game table or tournament of live game to which the cash register relates.

Remote data file: pokladna_stul_turnaj_bingo.csv

Remote item: IDPSTB

Item 4

Type of funds

Machine file name:

Prostredek

Data type:

Text with a length of 1 character

Item description:

Information on data expressed in this entry.

It shall be stated:

- 0** - total amount of cash funds
- 1** - total value of the valuable cheques at the casino's cash register or cheque counter
- 2** - total value of the valuable cheques in the cash register for tips

Item 5

Currency code

Machine file name:

MenaKod

Data type:

Text with a length of 3 characters

Item description:

In the case where "0" is entered in the item, the code of the currency in which the funds are deposited in the casino's cash register or in the cash register for banknote and coins shall be stated.

If the value of "1" or "2" is entered in the item, the currency code of the value cheque stored in the casino's cash register, cash register for cheque donation or cash register for tips is stated.

Item 6

Beginning condition

Machine file name:

StavVysePocatek

Data type:

Decimal number

Item description:

In the case of the item "0", the total amount of cash of the given currency in the cash register for banknotes and coins in the initial condition for the operating segment of the live game table, live game table used for tournament or the casino's cash register should be stated in the entry in the data file pokladna_stul_turnaj_bingo.csv established through the reference link listed in IDZaznamPSTB.

In the case where "1" is entered, the sum of the total value of the valuable cheques of the given currency in the cash register for cheque donation in the initial condition for the live game table or the cash register of the casino listed in the record in the data file pokladna_stul_turnaj_bingo.csv established through the reference link listed in IDZaznamPSTB.

In the case of the item "2", the total value of the valuable cheques of the given currency in the initial condition at the cash register for tips within the operating segment of live game table or all tables of the live game tournament listed in the record in the data file pokladna_stul_turnaj_bingo.csv established through the reference link listed in IDZaznamPSTB.

Item 7

Final condition

Machine file name:

StavVyseKonec

Data type:

Decimal number

Item description:

In the case of the item "0", the total amount of cash of the given currency in the cash register for banknotes and coins in the final condition for the operating segment of the live game table, all live game table used for tournament or the casino's cash register stated in the entry in the data file pokladna_stul_turnaj_bingo.csv established through the reference link listed in IDZaznamPSTB.

In the case where "1" is entered, the sum of the total value of the valuable cheques of the given currency in the cash register for cheque donation in the final condition for the live game table or the cash register of the casino listed in the record in the data file pokladna_stul_turnaj_bingo.csv established through the reference link listed in IDZaznamPSTB.

In the case of the item "2", the total value of the valuable cheques of the given currency in the final condition at the cash register for tips within the operating segment of live game table or all tables of the live game tournament listed in the record in the data file pokladna_stul_turnaj_bingo.csv established through the reference link listed in IDZaznamPSTB.

Data file VI

The data on total amount of cash funds or total value of valuable cheque in cash register and data with respect to drawing lots for bingo

Data file name:

PSTB_transakce.csv

Data file content:

The data file contained in the automated data output for daily gambling reporting shall contain total amount data about the transaction of cash funds or valuable cheques at the cash register, cash register for banknotes and coins or cash register for tips for operating segment of casino's cash register, live game table, tournament of live game.

The data file contained in the automated data output for daily gambling reporting shall contain summary data on the transaction of cash funds for the bingo drawing lot.

For each business segment, each transaction type, each currency, and each payment method, there shall be just one entry.

Conditions for including the data file in the data file:

The data file shall always be included.

Entry items:

Item 1

Identifier of total amount of cash, or total value of valuable cheques

Machine file name:

IDTransakce

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

Operating segment of casino's cash register, live game table, tournament of live game, or drawing lots for bingo

Machine file name:

IDZaznamPSTB

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier of operating segment of casino's cash register, live game table, tournament of live game, bingo drawing lot of which the entry on total cash funds, or total amount of valuable cheques relates.

Remote data file: pokladna_stul_turnaj_bingo.csv

Remote item: IDZaznamPSTB

Item 3

Casino's cash register, live game table, tournament of live game, or drawing lots for bingo

Machine file name:

IDPSTB

Data type:

Reference link with a maximum length of 50 characters

Item description:

The identifier of casino's cash register, live game table, tournament of live game, or bingo drawing lot to which the cash register relates.

Remote data file: pokladna_stul_turnaj_bingo.csv

Remote item: IDPSTB

Item 4

Type of transaction

Machine file name:

TransakceTyp

Data type:

Text with a maximum length of 2 characters

Item description:

Transaction types of the operating segment of casino's cash register

If a "P" value is entered in the item PokladnaStulTurnajBingo in the entry pokladna_stul_turnaj_bingo.csv data file referenced in the IDZaznamPSTB entry, the transaction type identification shall be stated in relation to operating segment listed in the record in the pokladna_stul_turnaj_bingo.csv linked through the reference link listed in IDZaznamPSTB:

- 1** - total amount of cash funds received to cover deposits in the live game tournament
- 2**- total amount of cash funds received in cash for deposition into a user account for online live game or other game or bingo deposit
- 3** - total amount of cash funds received and deposited by an operator to supplement the cash out of the cash funds that have been separated from cash related to operating games in the casino
- 4** - total amount of cash funds received and deposited by the operator at the casino cashier on the basis of other transactions relating to the transaction of valuable cheques or cash related to operating games in the casino
- 5** - total amount of cash paid out of the live game tournament
- 6** - total amount of cash withdrawn from the user account for online live games or other types of gambling or as win or return from bingo
- 7** - total amount of cash funds disbursed for the purpose of withdrawing cash from the casino's cash register, and hence from the cash funds that were up to that moment part of the cash funds for cash transactions related to operating games in the casino
- 8** - total value of the valuable cheques that were accepted differently than by means of cash register for tips
- G1** - total amount of cash paid as a refund of a live game tournament deposit due to the cancellation of the live game tournament
- H1** - total amount of cash funds received to cover other supply
- I1** - total amount of cash funds paid for the purpose of refund of other supply or parts thereof
- J1** - total amount of cash funds received to cover the purchase of valuable cheques
- K1** - total amount of cash funds paid by the gambling participant against the submitted valuable cheques
- L1** - total value of valuable cheques that were not returned or lost

Transaction types of operating segment of live game table

If the "S" entry is listed in the PokladnaStulTurnajBingo in the entry of the data file pokladna_stul_turnaj_bingo.csv referred to in the IDZaznamPSTB specifies the "S" value, the transaction type identification shall be stated in relation to the operating segment of the live game table specified in the record in the data file pokladna_stul_turnaj_bingo.csv linked via the reference link listed in IDZaznamPSTB:

9- the total amount of cash transferred from the banknote and coin cash register to the casino's cash register

10- the total value of the valuable cheques received at the cash register for donating the cheques from casino's cash register

11 - the total value of the valuable cheques transferred from the cash register for donating the cheques to the casino's cash register

12 - total value of the valuable cheques received at the cash register for tips

13 - the total value of valuable cheques transferred from the cash register for tips to the casino's cash register

J2 - the total amount of cash funds received to cover the purchase of valuable cheques

Transaction types of the operating segment of the live game tournament

In the case where the "T" value is entered in the PokladnaStulTurnajBingo in the data file pokladna_stul_turnaj_bingo.csv referred to in IDZaznamPSTB, the transaction type identification shall be stated in relation to the operating segment of the live game tournament in the data file pokladna_stul_turnaj_bingo.csv linked through the reference link listed in IDZaznamPSTB:

14 - the total amount of cash funds received to cover the purchase of the deposit to the live game tournament at the live game table

15 - the total amount of cash transferred from banknotes and coins to the cash register to the casino's cash register

16- the total value of the valuable cheques received at the cash register for the tips

17 - the total value of the valuable cheques transferred from the cash register for the tips to the casino's cash register

Types of transactions of operating segment for bingo drawing lot

In the case where the "B" item is listed in the PokladnaStulTurnajBingo item in the data file pokladna_stul_turnaj_bingo.csv referred to in IDZaznamPSTB, the transaction type identification shall be stated in relation to the bingo drawing lot specified in the record in the data file pokladna_stul_turnaj_bingo.csv linked through the reference link listed in IDZaznamPSTB:

A1 - the total amount of cash funds received for bingo bets

B1 - total amount of cash funds paid as winnings

C1 - the total amount of cash funds received to cover the bingo accompanying supply

D1- the total amount of returns of bingo accompanying supply that are returned for a reason other than correction

G1 - the total amount of bets returned as a result of bingo cancellation

H1 - total amount of cash funds received to cover other supply

I1 - the total amount of cash funds paid for the purpose of return of all or part of other supply

Item 5

The total amount of cash funds or total value of valuable cheques

Machine file name:

TransakceVyse

Data type:

Decimal number

Item description:

The total amount of cash funds or total value of the valuable cheques for the type of transaction listed in the TypTransakce item for the entire operating segment shall be stated.

Item 6

Currency code

Machine file name:

MenaKod

Data type:

Text with a length of 3 characters

Item description:

The currency code of the valuable cheques or the currency in which the transaction was specified in the TypTransakce shall be stated.

Item 7

The method of payment method

Machine file name:

TransakceZpusob

Data type:

Binary value

Item description:

Identification of whether the funds were received in cash or cashless.

It shall be stated:

0- cash payment

1 - cashless payment

If TypTransakce item equals to value "2, 3", "4", "6", "7", "8", "9", "10", "11", "12", "13", "15", "16", "17", or "L1", the blank entry (NULL) shall be stated.

Data file VII

The data on tournament of live game, game of live game and bingo game

Data file name:

hra_turnaj_bingo.csv

Data file content:

The data file contains the tournament details of the live game or part thereof and the bingo game. The entry relating to a live game tournament or part thereof shall be included in the data file in the daily gambling reporting for the calendar month in which the live game tournament or its part took place.

In the event that a live game tournament is held in more than one operating segment, one live game tournament entry shall be stated for each operating segment in which the live game tournament is held, which shall always contain information on the actual events occurring in the given operating segment.

Information on the facts that occurred prior to the first operating segment of the live game tournament shall be stated in the record for the first operating segment in which the live game tournament took place.

Information on the facts that occurred after the last operating segment of the live game tournament shall be stated in the record for the last operating segment in which the live game tournament took place.

In the event of a change in a record item value on the grounds that the item was not known at the time of first making the record or has changed since the last automated data output for daily gambling reporting or daily gambling log, automated data output for daily gambling reporting, or daily gambling log will be provided again for the period when the value of the item of the entry has changed.

An operator may also provide game and financial data in this data file for any live game that is not an online game or a tournament. These game and financial data are considered an expanded range of daily gambling reporting.

Conditions for including the data file in the data file:

The data file shall always be included.

Entry items:

Item 1

Identifier of bingo game, game of live game, or tournament of live game, or part thereof

Machine file name:

IDJednaHraCastTurnaje

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

Operating segment of live game table, tournament of live game or drawing lots for bingo

Machine file name:

IDZaznamPSTB

Data type:

Reference link with a maximum length of 50 characters

Item description:

The identifier of operating segment of live game table, tournament of live game, or drawing lots for bingo of which the game of live game, tournament of live game, or part thereof, or bingo game relates.

Remote data file: pokladna_stul_turnaj_bingo.csv

Remote item: IDZaznamPSTB

Item 3

Gambling table of live game, tournament of live game, or drawing lots for bingo

Machine file name:

IDPSTB

Data type:

Reference link with a maximum length of 50 characters

Item description:

The identifier of live game table, tournament of live game, or drawing lots for bingo of which the game of live game, tournament of live game or bingo game relates.

Remote data file: pokladna_stul_turnaj_bingo.csv

Remote item: IDPSTB

Item 4

Identification of live game tournament

Machine file name:

OznaceniTurnaj

Data type:

Text with a maximum length of 250 characters

Item description:

If "S" or "B" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with the reference link listed in IDZaznamPSTB, a blank entry (NULL) shall be stated.

If "T" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, the tournament identification of the live game that the operator stated in the notification of holding the tournament of live game shall be stated.

Item 5

Date and time of the beginning

Machine file name:

ZahajeniCas

Data type:

Date and time

Item description:

The date and time of beginning the bingo game, game of live game, tournament of live game, or part thereof, of which the entry relates.

Item 6

Date and time of the end of live game tournament

Machine file name:

UkonceniCas

Data type:

Date and time

Item description:

If "S" or "B" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with the reference link listed in IDZaznamPSTB, a blank entry (NULL) shall be stated.

If "T" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, the date and time of the end of the tournament of live game, or part thereof, shall be stated.

Item 7

The total amount of bets into bingo game, game of live game, or tournament of live game

Machine file name:

UhrnSazkyVyse

Data type:

Decimal number

Item description:

The total amount of bets in bingo game, game of live game, or tournament of live game shall be stated.

Item 8

The total amount of the received accompanied supply for bingo game, game of live game, or tournament of live game

Machine file name:

UhrnDoprovodnaPlneniVyse

Data type:

Decimal number

Item description:

The total amount of received accompanied supplies for bingo game, game of live game, or tournament of live game shall be stated.

If the accompanying supply was not provided, the blank entry (NULL) shall be stated.

Item 9

The total amount of the paid winnings from bingo game, game of live game, or tournament of live game

Machine file name:

UhrnVyhryVyse

Data type:

Decimal number

Item description:

The total amount of paid winnings from bingo game, game of live game, or tournament of live game shall be stated.

If the wins were not paid yet, the blank entry (NULL) shall be stated.

Item 10

The total amount of refunded accompanied supply for bingo game, game of live game, or tournament of live game

Machine file name:

UhrnVracenaDoprovodnaPlneniVyse

Data type:

Decimal number

Item description:

The total amount of refunded accompanying supply for bingo game, game of live game, or tournament of live game, which shall be refunded based on other legal reason than correction, shall be stated.

If the accompanying supply was not refunded by the operator, the blank entry (NULL) shall be stated.

Item 11

The total amount of returned bets

Machine file name:

UhrnVraceneSazkyVyse

Data type:

Decimal number

Item description:

If "B" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with the reference link listed in IDZaznamPSTB, a total amount of refunded bets which are refunded based on cancellation of bingo game shall be stated.

If the bingo game was not cancelled, a blank entry (NULL) shall be stated.

If "S" or "T" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, a blank entry (NULL) shall be stated.

Item 12

Limitation of deposits

Machine file name:

HraOmezeniVkladu

Data type:

Text with a maximum length of 250 characters

Item description:

If "S" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with the reference link listed in IDZaznamPSTB and if it regards to live game in which the participants of gambling play against each other and which is not provided in the form of tournament, a data regarding the limitation of deposits together with information of entries related, shall be stated. If the amount of deposit limitation was not setup, a blank entry (NULL) shall be stated.

If "S" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB and if it regards to live game in which the participants of gambling play against croupier, a data on deposit amount limitation shall be stated. If the amount of deposit limitation was not setup, a blank entry (NULL) shall be stated.

If "T" or "B" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, a blank entry (NULL) shall be stated.

Item 13

Determination of amount of bets for one betting ticket, mandatory deposit for game of online live game or deposit into tournament of online live game

Machine file name:

PovinnyVkladVyse

Data type:

Text with a maximum length of 250 characters

Item description:

Determined amount of bet for one betting ticket

If "B" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, a determined amount of bet for the bingo game for one betting ticket shall be stated.

The mandatory amount of deposit for live game

If "S" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with the reference link listed in IDZaznamPSTB and if it regards to live game in which the participants of gambling play against each other and which is not provided in the form of tournament, data regarding the amount of mandatory deposits together with information of entries related, shall be stated. If the amount of deposit limitation was not setup, a blank entry (NULL) shall be stated.

The amount of deposit for tournament of live game

If "T" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, an amount of deposit for tournament o live game shall be stated. If the amount of the deposit to a live game tournament changes, all the amount of the deposit shall be stated, together with the time interval related to the live game tournament.

Item 14

Currency code

Machine file name:

MenaKod

Data type:

Text with a length of 3 characters

Item description:

If "B" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, a currency code in which the bet for bingo game was received shall be stated.

If "S" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, a currency code in which the bet for game of live game was received shall be stated.

If "T" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, a currency code in which the deposit for tournament of live game was received shall be stated.

Item 15

The number of participants of tournament of live game

Machine file name:

TurnajPocetHracu

Data type:

Integer

Item description:

If "T" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, the total number of participants of tournament of live game shall be stated.

If the tournament of live game is provided in more operating days and all parts of tournament of live game were not finished, a blank entry (NULL) shall be stated.

If "S" or "B" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, a blank entry (NULL) shall be stated.

Item 16

The amount of participants' deposits received before the beginning of tournament of live game

Machine file name:

TurnajVkladyPredZahajenimVyse

Data type:

Decimal number

Item description:

If "T" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, the total amount of deposits of gambling participants which were received by the operator before the beginning of tournament of live game shall be stated.

If "S" or "B" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, a blank entry (NULL) shall be stated.

Data file VIII

The data on possible winning

Data file name:

mozna_vyhra_stul_bingo.csv

Data file content:

The data file shall contain data about a possible winning determined by cumulative portion of the deposit on each bingo game or live game table and about the cash funds that are earmarked to accumulate a portion of the deposit on winnings in another series tournament.

For each possible winning at each bingo or a live game table, and every currency in which the winning may accumulate, there shall be just one record corresponding to the record in the data file pokladna_turnaj_bingo.csv, which relates to the bingo drawing lot or live game table. For each tournament in which cash funds have been earmarked to accumulate a portion of the winnings in another tournament of the series, and each currency shall be shown just one entry corresponding to the entry in the pokladna_stul_turnaj_bingo.csv data file that relates to the live game tournament operating segment.

Conditions for including the data file in the data file:

Data file shall always be included.

Entry items:

Item 1

Identifier of entry on possible winning or on allocated cash fund

Machine file name:

IDMoznaVyhra

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

Operating segment of casino's cash register, live game table, tournament of live game, or drawing lots for bingo

Machine file name:

IDZaznamPSTB

Data type:

Reference link with a maximum length of 50 characters

Item description:

The identifier of operating segment of casino's cash register, live game table, tournament of live game, or drawing lots for bingo of which the entry on possible winning or earmarked cash funds relates.

Remote data file: pokladna_stul_turnaj_bingo.csv

Remote item: IDZaznamPSTB

Item 3

Casino's cash register, live game table, tournament of live game, or drawing lots for bingo

Machine file name:

IDPSTB

Data type:

Reference link with a maximum length of 50 characters

Item description:

The identifier of casino's cash register, game table of live game, tournament of live game, or drawing lots for bingo of which the game of live game, tournament of live game of which the entry on possible winning or earmarked cash funds relates.

Remote data file: pokladna_stul_turnaj_bingo.csv

Remote item: IDPSTB

Item 4

Identification of possible winning

Machine file name:

MoznaVyhraNazev

Data type:

Text with a maximum length of 250 characters

Item description:

If "B" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, the identification of possible winning determined based on cumulated deposit parts at a single bingo shall be stated.

If "S" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, the identification of a possible winning determined based on cumulated deposit parts at the respective single live game table shall be stated.

If "T" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, the identification of tournament series and serial number of tournament in it, shall be stated, alternatively if the earmarked cash funds determined for winning which shall be paid in different casino, the item IDMisto stated in entry in this different casino in data file misto.csv shall be stated.

Item 5

The amount of possible winning at the beginning

Machine file name:

MoznaVyhraVysePocatek

Data type:

Decimal number

Item description:

If "B" or "S" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, the amount of possible winning specified in item MoznaVyhraNazev at the beginning condition for the respective operating segment shall be stated.

If "T" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, a bland entry (NULL) shall be stated.

Item 6

The amount of possible winning at the end

Machine file name:

MoznaVyhraVyseKonec

Data type:

Decimal number

Item description:

If "B" or "S" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, the amount of possible winning specified in item MoznaVyhraNazev at the final condition for the respective operating segment shall be stated.

The amount of earmarked cash funds

If "T" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, the amount of earmarked cash funds for the cumulating purposes of the wins deposit in other serial tournament shall be stated.

Item 7

Currency code

Machine file name:

MenaKod

Data type:

Text with a length of 3 characters

Item description:

If "B" or "S" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, the currency code in which the possible winning is cumulated shall be stated.

If "T" entry is listed in the PokladnaStulTurnajBingo item in the entry of the data file pokladna_stul_turnaj_bingo.csv linked with reference link listed in IDZaznamPSTB, the currency code in which these cash funds are earmarked for cumulating parts of deposit for the winnings in other serial tournament shall be stated.

Data file IX

The data on total possible winning determined by cumulating the part of deposits with respect to live game

Data file name:

mozna_vyhra_pro_hru.csv

Data file content:

The data file shall contain the details of the total possible winning resulting from a portion of the deposits, which is being accumulated in relation to each live game.

One entry shall be provided for every possible winning resulting from a portion of deposits, which is being accumulated in relation to each game, and for every calendar day of the month covered by the daily gambling reporting or daily gambling log.

Conditions for including the data file in the data file:

The data file shall be included only when providing gambling and financial data on a live game that is not operated as an online game.

Entry items:

Item 1

Identifier of entry on possible winning for live game

Machine file name:

IDMoznaVyhraProHru

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

Live game

Machine file name:

IDHra

Data type:

Reference link with a maximum length of 50 characters

Item description:

The identifier of live game for which the total possible winning is cumulated.

Remote data file: evidence_her.csv

Remote item: IDHra

Item 3

Casino

Machine file name:

IDMisto

Data type:

Reference link with a maximum length of 50 characters

Item description:

The identifier of casino in which the total possible winnings determined based on cumulating the part of deposits that are generated based on each gambling as a whole.

Remote data file: misto.csv

Remote item: IDMisto

Item 4

The initial condition of total possible winning determined based on cumulating part of deposits which are based on each gambling as a whole

Machine file name:

MoznaVyhraProHruVysePocatek

Data type:

Decimal number

Item description:

The initial condition of the total possible winnings determined by cumulating a part of deposits that are generated in relation to the each gambling as a whole unless it is listed in any of the entry in the data file mozna_vyhra_stul_bingo.csv provided in this automated data output for daily gambling reporting, or a daily gambling log. The beginning condition shall be set at the beginning of the casino's operating day.

Item 5

The final condition of total possible winning determined based on cumulating part of deposits which are based on each gambling as a whole

Machine file name:

MoznaVyhruProHruVyseKonec

Data type:

Decimal number

Item description:

The final condition of the total possible winnings determined by cumulating a portion of the deposits that are generated in relation to the each gambling as a whole unless it is listed in any of the entry in the data file mozna_vyhra_stul_bingo.csv provided in this automated data

output for daily gambling reporting, or a daily gambling log. The final condition shall be set at the beginning of the casino's operating day.

Item 6

Currency code

Machine file name:

MenaKod

Data type:

Text with a length of 3 characters

Item description:

The currency code in which the possible winnings are cumulated shall be stated.

Item 7

A day

Machine file name:

Datum

Data type:

Date

Item description:

A calendar day in which the operating day for which the data are provided has started shall be stated.

Data file X

The data on change rate

Data file name:

mena_kurs.csv

Data file content:

The data file shall contain data on the exchange rate that is decisive for determining the gambling tax base for the entire taxable period to which data is reported in the automated data output for daily gambling reporting or daily gambling log.

For every calendar day of this taxable period, the exchange rate of each currency in which the gambling and financial data relating to that date, excluding the Czech currency, shall be stated. For each calendar day and each currency, a maximum of one entry shall be stated.

Conditions for including the data file in the data file:

The data file shall always be included in the data file containing automated data output for daily gambling reporting or daily gambling log for the last month of the gambling taxable period. In other cases, the data file shall not be included.

Entry items:

Item 1

Identifier of entry on amount of exchange rate

Machine file name:

IDZaznamMenakurs

Data type:

Identifier with a maximum length of 50 characters

Item description:

The identifier is divided in two parts.

First part: identification number of the operator providing automated data output for remote access, or if the identification number has not been provided to the operator, the operator's own number assigned to the operator in connection with the issuance of the basic license.

Second part: string determined by the operator.

Item 2

Casino

Machine file name:

IDMisto

Data type:

Reference link with a maximum length of 50 characters

Item description:

The identifier of casino for which the daily gambling reporting or daily gambling log is provided.

Remote data file: misto.csv

Remote item: IDMisto

Item 3

Type of gambling

Machine file name:

HraDruh

Data type:

Text with a length of 1 character

Item description:

One-letter identification of the type of gambling to which the exchange rate is determined.

It shall be stated:

B – bingo

Z - live game

Item 4

Exchange rate decisive for determination of tax base from gambling

Machine file name:

KursVyse

Data type:

Decimal number with up to 3 decimal places

Item description:

The amount of the exchange rate with respect to the Czech currency in which the financial flows and gambling processes took place, which is decisive for the determination of the gambling tax base, shall be stated.

Item 5

Currency code

Machine file name:

MenaKod

Data type:

Text with a length of 3 characters

Item description:

The currency code in which the financial and gambling process was provided shall be stated.

Item 6

Identification of calendar day

Machine file name:

Datum

Data type:

Date

Item description:

The calendar day to which the amount of exchange rate is generated shall be stated.

Subsection 5

Output of data file

The data file containing the automated data output shall be created by the operator as follows:

1. From the individual data files that generate the content of the automated data output, the operator generates a compressed data file.
2. The compressed data file shall be encrypted by the operator by the public key of the supervising authority.
3. The encrypted compressed data file shall be sealed by the operator with its accredited electronic seal.

Section 2

Providing automated data output

I. Method of providing the automated data output by the operator

An operator shall provide automated data output in an encrypted compressed data file sealed by the accredited operator's electronic seal by making it available to the following address accessible by encrypted authenticated HTTPS protocol:

https: // <URL> / <File name> .zip.p7e.p7s

The supervising authority shall access to the automated data output issued to this address by the HTTP protocol by GET method using RFC 7231 standard.

Address component	Specification
<URL>	The part of the website address used for compiling the address at which the operator makes the automated data output available to the supervisory authority.
<File name>	The name of the provided file containing the automated data output without any suffixes.

II. Requirements on availability of website address of the operator

The website address provided by the operator for the purpose of providing automated data output must be permanently publicly accessible via the internet and the duration of the single failure may not exceed 24 hours.

III. Confirmation of automated data output receipt

The acknowledgement file shall be sent by the supervisory authority using encrypted authenticated transmission via the HTTPS protocol's POST method in accordance with the RFC 7231 standard.

If the automated data output is formally correct, the supervisory authority shall send the acknowledgement file to the address:

https://<URL OK>?protokol=<File name>.ok.zip.p7e.p7s

If the automated data output is not formally correct, the supervisory authority shall send the acknowledgement file to the address:

https://<URL chyba>?protokol=<File name>.err.zip.p7e.p7s

The supervisory authority shall also make the acknowledgement file available on a server, which can be accessed by the operator using encrypted authenticated transmission via the HTTPS protocol.

Address component for the sending the acknowledgement file	Specification
<URL OK>	The part of the website address provided by the operator used for compiling the address, to which the acknowledgement file is to be sent when the automated data output is formally correct.
<URL error>	The part of the website address provided by the operator used for compiling the address, to which the acknowledgement file is to be sent when the automated data output is not formally correct.
<File name>	The name of the delivered file containing the automated data output without any suffixes.

IV. Confirmation file

If the delivered automated data output is formally correct, the supervisory authority shall acknowledge this fact by means of the data file named <File name>.ok containing the information that the file has been processed successfully.

If the delivered automated data output contains formal errors, the supervisory authority shall acknowledge this fact by means of the data file named <File name>.err containing the computer output from processing the automated data output.

Component of the name of the data file containing the acknowledgement	Specification
<File name>	The name of the delivered file containing the automated data output without any suffixes.

The supervisory authority shall create the acknowledgement file using the following procedure:

1. The supervisory authority shall create a compressed data file from the data file containing the acknowledgement.
2. The compressed data file shall be encrypted by the supervisory authority using the operator's public key.
3. The encrypted and compressed data file shall be sealed by the supervisory authority using its qualified electronic seal and qualified time stamp.

Section 3

Common provisions

I.

When compressing a compressed data packet from one or more files, these files are compressed into a single file by the ZIP method by ISO / IEC 21320-1: 2015.

The files in the data file are not organized into directories.

The file name of the compressed data file is zipped.

II.

When encrypting a file with a public key, the encrypted file is saved in the Cryptographic message syntax (CMS) format using the Enveloped-Data content type according to the RFC 5652 standard.

The name of the encrypted file, including any extension, is provided with the extension p7e.

III.

When sealing the file, the operator shall provide a set of accredited electronic seal in CADES format according to the standards ČSN ETSI EN 319 122-1 V1.1.1 and ČSN ETSI EN 319 122-2 V1.1.1.

Seized data, electronic seal, and any time stamp are stored in a single file whose name, including any suffix, is provided with the extension p7s.

IV.

When filing the file, the supervising body shall provide a qualified electronic seal with a qualified time stamp in the format CADES-B-T according to the standards ČSN ETSI EN 319 122-1 V1.1.1 and ČSN ETSI EN 319 122-2 V1.1.1.

Seized data, a qualified electronic seal, and a qualified time stamp are stored in a single file whose name, including any suffix, is provided with the p7s suffix.

V.

When encrypted authenticated HTTPS traffic, the following conditions must be met:

1. The protocol used must be HTTP / 1.1 according to RFC 7230 with the use of "Accept-Ranges", "Range" and "Content-Range" headers according to RFC 7233.
2. Transmission must be through the Transport Layer Security (TLS) cryptographic protocol in a version at least 1.2 according to RFC 5246.
3. The access to the website is authenticated by a qualified client certificate in the X.509 format according to the RFC 5246 and RFC 5280 standards.

VI.

The cryptographic algorithms, cryptographic keys and certificates used must meet the cryptographic requirements of the Cyber Security Regulation.

VII.

Decimal character codes represent unicode character codes in accordance with RFC 3629 for the purpose of providing automated data output.

VIII.

In the case where a text in this Annex is written in typewriting, it shall be specified in the wording. In this case, the character `_` represents a premises (character with decimal code 32), the characters `0 1 2 3 4 5 6 7 8 9` represent digits (characters with decimal code 48 to 57), characters `A B C D E F G H I J K L M N O P Q R S T U V W X Y Z` represent uppercase characters without diacritics with decadic code 65 to 90), the `a b c d e f g h I j k l m n o p q r s t u v w x y z` characters are lowercase characters without diacritics (characters with decimal code 97-122), `_` is an underscore (decal code 95) and a character. represents a dot (character with decimal code 46).
